Subject: Possible UFO Crash in Ventura County, CA (a must read)

Mime-Version: 1.0

Content-Type: text/plain; charset="us-ascii"

You might be interested in this and I wish I could give you the exact month

of this occurrence. Late one evening between I believe, March 1976 and

July 1976, there was reported in the Simi Valley Local newspaper that several motorists and at least two police officers saw a UFO coming from

the southwest over the Simi Valley Freeway and going northwest, appeared to

crash at what was termed the Hummingbird Ranch just north of the Simi Valley Freeway at Kuehner Avenue at the off ramp coming westward into Simi

Valley at Kuehner. Hummingbird Ranch is the right turn from the freeway

off ramp on Kuehner. A left turn would take one under the freeway overpass

down Kuehner to Los Angeles Avenue at the signal.

It had to have been in this time frame due to the following incident which

occurred that night. For obvious reasons, I'd remained silent on this

incident. At the time, I was a candidate for the 30th Congressional District of Calif. (Federal level). I worked full time in the San Gabriel

Valley and before and after work, spent my time walking the precincts distributing my literature. It was quite late, at least after 11:00 PM.

My eldest son, Larry had been honorably discharged from the USAF and was at

home watching over our 4 minor children. My husband was then on a job in Alaska.

It had to have been a Tuesday night, as the Simi Valley local paper is

published on Wednesdays and this incident of a UFO was reported in that next edition after I'd had my experience. As I came off the Simi Valley Freeway at the Kuehner offramp for my home in the Golden Valley Estates, southeast of the freeway (east of Kuehner and LA Avenue), I made a full stop at the sign on Kuehner. And actually paused a moment, perhaps due to thinking something out concerning the campaign and the fact it was so late and not necessary to just move along. Suddenly, to my right I saw a hand with elongated fingers on my passenger side window and then a gnome like man's head popped up. He was beating on the window pane frantically, and was frightful in appearance. He had an extremely long neck (in retrospect, he was much like "ET" but more human looking and that movie had NOT been made.). He appeared to be bald, very aged and wrinkled and tiny, gnome like. I panicked in truth, and gunned the car, turning left on Kuehner and raced home terrified. I didn't know what I'd seen but it did not seem human. I raced onto the driveway, didn't bother to put the car in the garage (a Ford Country Squire station wagon) and bolted inside the house locking the door and dead bolt. My son seeing the pure panic and fear on my face asked me what happened. So, I related it to him. My younger son said that a neighbor was at the time visiting and waiting for me to come home from work. He believed that [REDACTED] was at the house, too! The only reason that this came up is that oddly he and I were discussing this only last week again. At any rate, I suddenly felt that I'd abandoned this individual. And again panicked. I got my 4 small children, my eldest son (who drove), the neighbor and me back into the car and went up to look for the "old man" as I feared I might have knocked him down and injured him. My eldest son was a paramedic. He was not at the offramp of Kuehner but we saw what we perceived to be lights up on Hummingbird Ranch. So, my son drove the car on up the entrance road to the ranch. Suddenly two armed soldiers were in front of the car, and aimed the guns at us, telling us to stop. We all saw ahead lights flooding the entire open area of the ranch and I mean brighter than any movie set would have. I

worked for years in the TV and motion picture industry and no night shots ever had the lighting we saw. It was over whelming. There was military all over the place. We were harshly told that we were to turn around and leave immediately. That a picture was being shot there. Now, again, TV and motion picture studios do NOT use the military to guard their locations, but do use security guards. These were NOT security guards. We did not know what to think of it, and were all shaking as hard over this as I'd shaken over the encounter. We didn't know what to think. Except for one thing everyone agreed on that I kept repeating. That I felt I had to find the "old man" and get him to the desert where he would be safe and rescued. Now what kind of thought is that? The next day after I'd come home from work, there was on the front page the article about the motorists and two officers having seen what they believed to have been a UFO crashing at the Hummingbird Ranch. That article would be in the papers' archives and it might be worth checking out. As the more we all thought about this over the years, the more convinced we all were that I'd seen an extra-terrestrial. And maybe this one was not covered up as well as others have been. The names of the individuals who saw the UFO were also printed in the article. I thought maybe after hearing Dr. Steven Greer in part on Art Bell last night that he might be interested in this. I've printed your address page, etc. out and as soon as I can will send a donation. I've tried to find CSETI but just went on line this week and this just helps me a bit sharing the information. I've seen UFOs too often, too long and had some very strange encounters and have met several people who also had very odd encounters and stranger incidents with the government over them. Sometime after this incident, in 1976, my eldest son (the one who drove up there with me) was beaten up by two Simi officers, one whom he knew in front of at least 30 witnesses and for no crime or offense. He was a paramedic with the local ambulance company and it shocked him. More shocking was that the officer said it was NOT him, he was not there. But my son insisted it looked like him except for HIS EYES didn't seem like him. You could not mistake this officer as he is 6 foot 9 inches tall but

he repeatedly insisted to me on the Q-T that he WAS NOT the officer that beat up [REDACTED], it was NOT him and to get my family out of Simi Valley.

Four years later, my son [REDACTED] was murdered in Ventura County while in police custody (they said a suicide, but I did get a revised death certificate after two federal court trials) and the FBI showed up at the hospital where he lay dying in the coma from the horrid beating, and told me "that he (my son) knew full well what he was getting into when he got into it with them 4 years earlier. He knew that it could end this way.

[we found on his military records that he'd been given a Gvmt. 6 security clearance 2 days before his discharge from USAF] That people undercover are often murdered and made to look like a suicide", which it wasn't and why the agent had me watch him physically check my son's body in the ICU room first. His name was Agent [REDACTED] FBI out of Westwood, CA.

I have often wondered if there was a correlation to the UFO incident, or to cloning or both but did not speak about it out loud, except among the family. I'd even first wondered if it could have been a body organ ring or something like that because I knew it had nothing to do with drugs. I do know one thing for certain. I have never, never been able to erase this gnome man's face from my mind. I realize more and more that he was more frantic than I was and so terrified. And that he needed help in capital letters.

Side note: I also had two different growths removed from my body in recent years, which were identified by labs (note plural of lab) that the doctors found difficult to relate to me. Both had DNA structures of an insect infection not known to exist on this earth. The labs were UW, the Center for Disease Control, Atlanta, GA, and the USAF labs, where the doctors sent the matter to be examined. These were very weird things, abnormal in structure and exceedingly painful until removed. One was opaque, milky and round, very smooth like a marble almost, with about 7 tentacles at one end which the doctor said were wrapped around the nerve endings in my finger and hand. The other was some form of spontaneous blister that became a flesh eater on my left arm. I had about 3 1/2 inches by 1/2 or better deep

removed from my arm for the labs. Both of these insect infections were on the left arm or left hand. I'm not a nut but it feels better telling at least someone who believes in this. [REDACTED] met me briefly right after the arm infection

[REDACTED] a
d and
now
And

my husband and I have reported to the UFO hotline very concise sightings which Peter Davenport has called back stating that we were excellent observers, and that police and/or credible witnesses had also reported what we'd seen and reported. They can't continue to hide these things forever. Anyone who believes we jumped from horse and buggy to space without help has no brains. It didn't just evolve suddenly out of the blue or it would have occurred sooner. And we don't spend the trillions on the space program to have a chosen few go out there to play or putts around. That could be accomplished on earth in a simulator at a lot less money. Our world governments know there is life out there. And they pretty much have it figured out that we are getting smarter about that, and their reasons to waste our money. Hence, we are getting the TV-Movie bombardment of alien whatevers, who are all BAD, to fear and to protect ourselves from them. Thus, the government perpetuates the "we know what's best for you and WE protect you! at your expense." Hope this has some value to you. But thank you CSETI for at least letting me get this off my chest to someone who is not a kook and who does not think such events are "crazy". I feel better.

[REDACTED]
