

[REDACTED]

Notes taken the night after [REDACTED] and I first met in 1986 w/addendums

- White line parameter around craft that Air Force generals could not get past. ([REDACTED] told me on another occasion that he personally had to stop the Secretary of the Navy from crossing that line)
- In military transport w/no windows near him he was flown 2.5 or 3 hours from Cherry Point, North Carolina (presumably a Navy or Marine base) in unknown direction to unknown base (also presumably but not necessarily a U.S. military base) w/others
- Maybe a location out of U.S. – an island? Bahamas?
- One day he came to work and UFO was gone ([REDACTED] told me on another occasion that on the last day he witnessed craft off its blocks/gridwork and on a flatbed trailer being prepped to move) – he [REDACTED] called O.D. (officer of the day) who didn't know what was going on – who then checked his orders about the craft and then said "Oh here they are right on my desk ([REDACTED]s orders) So you guys ([REDACTED] and his crew) are relieved" Then they went over to G-2 (base intelligence office) and signed papers (security oaths).
- Mirror finish (on the craft)
- Recessed "windows" 1 inch lip
- Craft was constantly well lit
- Event happened in Dec 1963
- Didn't need a flash on his camera
