Dear [REDACTED]

Below is some good news that might help you. Dr Greer, who shared your book table at the Laughlin Conference where he also presented an excellent lecture, is an old friend of mine and most assuredly on -our side-.

He has just received substantial funding for a witness disclosure documentary series. He has well over 200 witnesses similar to yourself who need to tell their story without fear of reprisal. The safety in a private group disclosure which is publicly broadcast repeatedly to tens of millions of people is long known. Once it gets to this stage you are pretty much too high profile for the dastardly actions they can do when you are alone and unknown.

Most of the witnesses are ex military, astronauts or sub contractors who worked on secret projects related to events similar to your encounter. Some are citizens like yourself who just got caught up in an unbelievable drama.

I suggest you contact Dr Greer and discuss this program and your situation with him as it just might save your life and enable your story to be seen and heard by millions. You have a wonderful and tragic story that needs to be heard and you have wonderful evidence. This process of public disclosure helps heal the wounds of our corrupted society and enables us to more clearly embrace a more realistic future.

You can email Steven at: [REDACTED]
or write/ phone him at:
Steven Greer, MD

[REDACTED]

Good luck to you [REDACTED]. I leave for England in two weeks to gather more beautiful evidence of contact to show to people who just might be nudged awake a bit as a result of our disclosures.
In case you go over there [REDACTED] and I can be reached at my mobile phone: 0 [REDACTED] 9 We would welcome your company.
The circles would be a healing experience for you to consider. We believe at this point that they are made by forces and intelligences very different from the type that changed your life. This is a very big universe indeed!

All best wishes,

[REDACTED]
