Dr. Stephen Greer
The Disclosure Project
[REDACTED]
[REDACTED]

Dear Dr. Greer,

I attended your May 9, 2001, press conference and follow-up workshop in DC. Since then I've spent hundreds of hours in researching and following this subject and bringing it to the attention of others.

Enclosed is a donation for \$25 to help with the documentation of testimony. After reading the replies on you web site from congressional members, I am convinced that Congress will never hold public hearings, and if they ever do it will be years after every person on Earth has accepted the existence and presence of aliens as fact.

I, therefore, believe strongly that organizations such as the Disclosure Project must press forward with collecting, documenting, and publicizing the information.

→ Last November I visited a retired Air Force friend and asked him whether he believed in the existence of aliens and alien vehicles. He laughed and said of course he believed, and that he was probably the only person in the Air Force he knew who had NOT seen an alien aircraft while flying. When I asked him his thoughts about genetic engineering, he told me that if he told me certain things that the government was doing I would go kill myself because it was so evil. He would not discuss this further. I asked him if the research were biological or mechanical, to which he would answer only "yes."

Keep up the good work.

Yours truly,
