Subject: My Apology

G'day from Australia, Dr Greer,

I have had time to cool off after my unfortunate exposure to [REDACTED]. It was largely due to his academically antagonistic and dismissive emails to me that I sent [REDACTED] my own dismissive email.

It was also my misconception that Sarfatti was somehow connected with your program. I have just read your page on the CSETI site where you address Mr [REDACTED] discussions with you. Now I understand the situation with a little more clarity. I do apologize to you and Tony for my abrupt and dismissive email. It was ill-informed of me.

Perhaps you and I can once again attempt to establish a meaningful dialogue on the whole issue of the suppressed technologies of that "invisible college" of physicists, engineers, pilots, technicians, bankers and industrialists which has so effectively kept the secret for so many decades.

The plot of the entire coverup is not a straightforward one. It is more like a complex and convoluted gambit eventually met and beaten by deception and betrayal at the highest levels of governments....

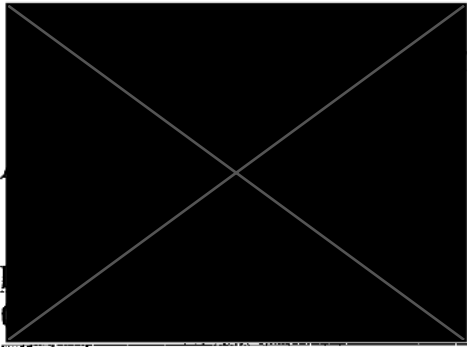

I truly wonder how you are going to be able to deny them their current objectives. There is so little support and so much fear. There is so little time left.

My agent, a scriptwriter and I have been developing a screenplay based on my life inside that "invisible college" of which Teller was an integral part. We offered the script to Dreamworks through a personal contact on the executive level. He liked our script but was afraid it would jeopardize their current military contracts if they produced it - especially with the plot we had suggested.

In closing, I do wish you success in your effort to find and release the truth of this mammoth, black operation. If my testimony will help then I will cooperate as best I can.
