I Saw a UFO

English subtitles

Everything is very interesting around us, and UFOs are observed in many, many countries. Once I saw a huge UFO in Perm. I was invited by a man who recently died, very nice, he was the founder of Perm, the Perm zone.

We went outside. Our whole expedition was down there. There was a huge-huge long ball (cylinder) flying. I have already seen a similar photo of the same huge ball (cylinder) - like an airship, only not like this, but elongated... Then two objects separated from it, and went down - to where our people were located. And I was very scared. I had the phone number of one of our people who was down there. I said: "The balls are coming down to you now!". The answer was: "We are waiting for them, we are waiting for them." This was my first encounter with the "space airship".

And then I found out that [REDACTED] had photographed an equally long airship in space as it sailed over the Moon. And a Japanese man took a picture of a "blimp" flying over the moon, as they say, a kilometer and a half long, and he also took a picture of this "blimp", this spaceship.

So they fly everywhere and they certainly outperform us in all aspects - that's 100%, now we're convinced of it.
