Hello my name is [REDACTED] in 1990s I worked as a contractor for the M.O.D. here in the U.K. on few occasions the staff there would show me strange things to do with U.F.O.S.

On one particular occasion I had to change water service to a experimental building to which the certain experiment had been going for 8 years according to the C.O.

I was led into the building under armed guard, to inspect the water service and as I walked past a large glass wall I noticed behind said wall were 6 large glass tubes and suspended in those tubes in a liquid were 6 small beings wired and twitching, it was only a passing glimpse, but they seemed as though the skin had been peeled from the bodies,

the person who ran the M.O.D. at that time occasionally appears on youtube, kind of sitting on the fence discussing such things, but in reality he knows the truth,

I am a seventh born child so I do know of and understand your intentions, and for your same reasons do not discuss this for fear of repercussion, however we have to be brave if we are going to change the world, so I am in with your proposal, as we have to seek help if we human beings are to survive the madness, I would welcome any being who is prepared to help mankind, although saving the planet is my main concern, [REDACTED]
