Subject: To Dr Steven Greer - re Project Sirius (regarding helping with the film)

Dear Mr Greer,

I have followed your work and the disclosure movement with great interest and passion for a long time now and recently heard you are trying to contact new witnesses and people for your sirius project.

I live in the UK but feel a deep compelling wave to contact you regarding my experience and because I've done media work before and lots of public speaking (Home Office, House Of Lords, House Of Commons, National British TV etc) I think I could help you out.

I've had many personal experiences and have done a lot of research into the UFO phenomena. I was always fascinated with the topic but never more so than the average person. I had a family UFO sighting in 1991 and that always intrigued me and from memory it was seen by quite a few people across Kent (South East England) and was in the local media. I've always been certain its very real but in 2010 my life changed after a series of personal life changing events and sightings that seemed to keep happening and are on going to this day.

One sighting was again seen by my whole family and some neighbours and I also managed to video some footage including two metallic spheres spinning and hovering over my boyfriends house. I also witnessed a semi transparent green-tinged triangle shoot through the clouds in late 2010 too.

But most prominent was the infamous 'orange orbs'. These are often mistaken for Chinese lanterns and I would have thought that's what they were had I not seen them up close and after being at wedding parties with Chinese lanterns I know the difference, how they move, how the flame flickers, the colour and shadows it casts and more from close up to high up so I know what I saw was not Chinese lanterns. It seemed to happen after a friend saw one, told me about it and then I saw one for myself in broad daylight with that friend over his car and his dad also saw one over his garage and it shocked him. These objects are like mini suns, perfect round, beautifully bright orange orbs of light. Quite a few people have seen these now and they are showing up worldwide, as you know.

In November 2010, with my boyfriend and family, as leaving my parents house we witnessed three of these orange orbs fly over the roof of the neighbours house in front and as we spotted them they stopped and hovered, in a line and then into a triangle formation. They almost seemed to 'observe' us. It blew me away and I was so in awe. Then after about 3 mins they all shot off at high speed in different directions (something else that lanterns don't do). It was a calm clear evening. That event seemed to change my life. It changed something within me like it 'woke me up' and something clicked.

Everything in my life altered. Previously I'd been working in the music industry and released two records but sadly I was stalked for five years and gave my career up as a result. From my own hard work I tracked the

offender down and they were caught and arrested. As a result I was doing speeches at the House Of Lords, Home Office, House of Commons etc and helping to change stalking laws. I was being interviewed on national tv (BBC news, ITV etc) and radio etc and my life made a dramatic turnaround. It was like something special 'touched' my life. Hard to explain but it led me to buy countless dvds and books on ufos, the truth movement, space, secret history, ancient aliens, religion and more and every day since I have thoroughly researched it. It's become a huge part of my life and I know a lot about the subjects and key cases etc. The Disclosure Project was something I watched about 30 times. It just hit a chord with me.

It's something I can never forget about. It's almost like some life changing events changed my life and it was meant to be and I feel a deep inner voice calling to me daily know. I feel we are on the cusp of something huge and my job is to help guide and teach others.

whilst I was in a private meeting at the Crown Prosecution Service and the Home Office we were dealing with ways to combat cyber stalking (which my stalker did most of their stalking when I was working in the music industry) and they wanted victim perspectives. I couldn't believe the turn around my life had taken, that I was working closely with UK government officials and equally discovering the ways in which they planned in clamping down on internet freedom and law and ways to block certain content. Wikileaks was discussed along with other whistleblowing associations (Anonymous etc) and how to deal with sensitive data. I probed about the UFO subject and was told that whilst the National Archives would be releasing more files of UFO reports through the years the 'important' and sensitive material that could stir a disruptive and wayward public reaction would be held back. Upon asking, if they meant there was anything that therefore confirmed ufos and presence from other life forms was real I was met with a nod, an awkward shuffling of papers. I probed more but from paper work I saw and the inclusion of IAC (identified alien craft, as I later discovered) and UFO among subjects to be monitored and filtered online, I knew they were well acquainted with the reality of the subject.

After many personal experiences and sightings someone very close to me also had very personal experiences and had a breakdown over it as it affected them so much (though this is so personal it's not something I'd publicly talk about). They spent most of 2011 in hospital, it was harrowing and I spent a lot of time trying to help them. Even this week they have been taken back into hospital.

I feel like I understand life somewhat more now, the meanings behind it and that something beautiful is unfolding.

As soon as my 'awakening' happened I started seeing massive uprisings online etc. I've had extremely vivid visions, premonitions and dreams since and feel constantly altered to something happening. Now I see so many being affected by it worldwide. This subject changed my life forever and I believe it was for a purpose and now I do my best to open other peoples eyes to it whilst my experiences and awakening continues. It is truly incredible.

I would love to help with your documentary so please feel free to get in touch.

I'm free for a chat on Wednesday or Thursday after 3.30pm. My contact number is: [REDACTED] (UK mobile) and, of course you can also contact me via this email address. I will be filming with UK channel 5 on Monday and Tuesday so Wednesday or Thursday would be ideal. I will also be free tomorrow or tonight if you want to call.

I look forward to hearing from you soon.

Kind regards

[REDACTED]
