

Admiral of the Fleet The  GCB

Dr Steven M Greer MD
CSETI

UNITED STATES OF AMERICA

25 June 1996

Dear Dr Greer,

Thank you for your Express letter which arrived in 48 hours.

I am glad to hear of the excellent progress you have made, and I hope that you will keep me in touch.

I am sorry to say that I cannot help in any of the directions you have suggested. I have taken discreet soundings and I recommend that you do not attempt to approach the Prince of Wales while on his visit next month. He is not known to have any interest in these matters, though his father has shown some in the past.

The Press is full of stories about Bonneybridge, but I know of nobody who can advise me at first hand. I should not have thought that a trip by private jet would be worth the time and money and effort unless you have some harder evidence.

Two good UFO books have recently been published here, one by Tim Good called Beyond Top Secret and the other by Nick Pope called Open Skies Closed Minds. Pope is a medium rank Civil Servant (still serving) who had the UFO desk in the Ministry of Defence, for three years until quite a short time ago.

Yours sincerely,
