Subject: I am a witness to a Mile Wide craft & a Close Encounter + I know of video

I am pleased you have raised so much in such a short time and I hope all goes well for the film.

My partner and I have witnessed a Mile wide craft arrive on 13th December 1998 which flew over our home twice the same night at the same speed as a satellite that also passed over twice that night.

Two years later we experienced a close encounter with a very strange craft indeed - what that could do for transport or the way we live is just mind blowing - Imagine a home that could fly!

Here is the original footage uploaded by the person who filmed this to his youtube channel of a Mile Wide ufo passing over Freemont California at a phenomenal speed! Please contact the uploader for more information This craft is known to many witnesses around Phoenix in 1997 dede95064 (Youtube name) Filmed this on 5th December 2008 He is the original filmer

(Additionally we are searching for additional evidence related to UFO events, including:

| Clear and dispositive photographs and videos with clear ownership and

history) http://www.youtube.com/watch?v=XevJR7biQE8_

(<http://www.youtube.com/watch?v=XevJR7biQE8>)

Here is a video which I have put together that explains how the 1997 Incident was hushed up by the military you will find witness testimony from 1997 of the craft above that [REDACTED] filmed over Freemont in 2008

PLEASE BE CAREFUL WHEN CONTACTING [REDACTED] He has had an attempt by a well known TV programme to debunk his footage as a hang glider with LED lights. Two points that show it is genuine footage Above contrails (30000ft) and the speed that thing is going!!

Also closest thing I have seen too my own Mile wide ufo in 1998 which there is an image of at the start of this video below:

[REDACTED]

The witnesses are ALL contactable! I shall forward this email to [REDACTED] to let him know you will be in his area soon!

Regards

[REDACTED]
