RE: The [REDACTED] Initiative.

[REDACTED]

THE [REDACTED] E. from Dec/Jan UFO Reality.
Dear Mr. [REDACTED] <Editor>

It has been suggested that I should take the initiative to establish an informal group of sensible and respected people who are genuinely concerned with the implications of the UFO phenomenon now manifest worldwide, including Britain. The aims of such a group would include the dissemination of information based on facts, not fiction, together with recommendations for appropriate action. I have been personally interested in this baffling but challenging problem for many years, and I am in touch with several others who share my view that strenuous efforts should now be made to address the problem.

The available evidence indicates that alien, non human intelligences and influences are operating increasingly amongst mankind, frequently in a manner which should cause real concern, not only from a national security standpoint, but also because <whatever they are> these "UFO,s" actually appear in a physical, material sense. Reported contacts with them have seldom been beneficial, even if sometimes they have appeared to be so.

It has been suggested that the subjective influence of UFO,s is essentially a religious matter, because any sort of contact made at the personal level frequently has some sort of religious, spiritual dimension; quite often such experiences are definitely antithetical to orthodox Christian belief. Opinions may well differ as to the precise nature of these occurrences, and also what, if anything, can be done about them.

In any case, my associates and I consider that the time may well be ripe to form an informal group which can both assess latest developments, and attempt to recommend appropriate action to deal with the problems involved. It is my present view that the first-and perhaps the most difficult-task will be to persuade the public that there really is a problem, and a serious one at that.

I should be glad to hear from anyone who shares these views, and would like to support the initiative outlined above. Suggestions for practical steps which might be taken to further these aims would also be welcome.

If you feel able to give some publicity to the above, as I hope you may, I shall naturally be very glad to hear from any of your readers <or anyone else> who might care to get in touch. People may simply write to.
