APC 154

21 November 1947

I-W-D 775

MEMORANDUM FOR THE OFFICER IN CHARGE

SUBJECT: HORTEN, Rainer and Walter (brothers)

RE: Flying Saucers

1. Reason for Investigation.

a. Reference is made to letter, Headquarters, 970th Counter Intelligence Corps Detachment, APC 154, US Army, dated 28 October 1947, paragraphs 2a and 2b.

b. Reference is made to letter this Headquarters, dated 4 November 1947, Subject: as above.

2. Results of Investigation.

a. The HORTEN brothers were last known to have been working in GOETTINGEN (L52/C52), British Zone, in the fall of 1946, at the KAISER WILHELM INSTITUTE, in the branch formerly known as AERODYNAMISCHE VERSUCHS ANSTALT, presumably for the British. O-37-I-G has heard nothing since that time regarding the HORTEN brothers other than the rumor that they were kidnapped during the latter part of 1946, presumably by the Russians.

b. O-37-I-G stated that the HORTEN brothers had designed four (4) gliders designated as the HORTEN I, II, III and IV, and that at a later date had designed a conventionally propelled airplane patterned after the gliders designated as the HORTEN V. O-37-I-G saw the HORTEN V, described as a flying-wing type airplane, flown at LECHFELD (M49/I26) in March 1944.

3. Agent's Comments and Recommendations.

a. It is expected that more information will be forthcoming within a week from O-37-I-G regarding the HORTEN brothers.

b. It is suggested that a qualified aerodynamics engineer question O-37-I-G for specific and detailed information on all phases of the flying saucers.

c. It is further suggested that members of the scientist
