

felt their sting since I presented my first paper, *Retrievals of the Third Kind*, at the MUFON Symposium in Dayton, 1978. While most of these early adversaries have faded away, little loops persist who employ subtler ways to undermine my work.

Haunting me still, is a remark by a loop kingpin averring that all my case histories, published in my series of status reports were "fairy tales", thus of no substance. Drawn into his loop is a pundit, a prominent writer in UFO media, who, having belittled my work since 1978, has worked well into the scheme. In later years, through his editorial controls, whenever C/R was an issue, my work was simply snubbed. More recently, still another in the loop told a mutual correspondent that my investigations have no depth and that I'm a good subject for disinformation.

Obviously, sad to say, these loopers have not done much "investigation in depth" about my *modus operandi* or, have taken into consideration, the lack of funds at my disposal to follow up hundreds of leads, coast-to-coast. Also, it is beyond my comprehension how some of my contemporaries can entertain the notion that I have gullibly accepted as valid, or *bona fide*, every item of C/R material published in my papers. Once again, for the record, the purpose of my status reports is to draw in *new* sources with *new* information that could either strengthen a case or give reason to drop it in the circular file.

True, that some of the best made plans go awry and, true, that some entries in my monographs have obvious weaknesses and some, based on new information, have become questionable. Example is Case A-2, *Status Report III*. However, the mainstream material from early sources remains solid and one, I thought, that deserved a full investigation was the Ft. Dix-McGuire case which has become stronger from *new* information from *new* sources. Someday, perhaps, for the record, I may write a special paper updating the status quo of my published case histories.

While the mid to late 80's did not produce any substantial Crash/Retrieval case histories worthy of a monograph, except the Ft. Dix-McGuire affair, it was not devoid of highpoints.

CASE 1) While attending the MUFON Symposium in St. Louis, 1985, Raymond Jordan, a MUFON investigator, gave me a confidential lead to follow up involving a lady who had worked at the Pentagon in 1952, who, he said, had seen an alien body "pickled" in a glass tank in an "Off Limits" room. By mistake, she had entered the room, was promptly nabbed and forced to sign papers swearing her to secrecy. When I reached the lady, who was still employed by a government office, she said, "I know what you're talking about," then added, "but, I can't talk." I suggested she communicate by other means to which she replied, "No. I don't want to talk about it at all."
