List of Alien Crashes

CSETI's interest in this matter stems from the fact that Earth is being visited by ET's with benign intentions who are currently being tracked, targeted and shot down by covert forces operating outside democratic controls.

This assessment of the situation and the ET's intentions is endorsed by CSETI military and intelligence witnesses, some of whom have been on the retrieval teams.

Events listed include those where ET's may have been captured (dead or alive), but craft were not retrieved. Events involving only the recovery of artifacts are listed as well. In some instances, the reports may be duplicates covering the same incident.

Some events probably also involve mishaps with ARV's (Alien Reproduction Vehicles), or weapons platforms, of terrestrial manufacture, and some may have been SDI (Star Wars) or scalar electromagnetic (Tesla) weaponry episodes. These are banned by treaty but are being conducted at an escalating rate.

At least three nations on Earth now have their own electro-gravitic "flying saucers". Some may also have been events involving captured ET craft. Hence the numerous Press Releases about "meteors" by various National Laboratories.

Some incidents may have even been psychological warfare experiments involving holographic projections - and some, too, may be outright disinformation.

A thought of remembrance, though, for those beings of all species who perished in the crashes, and for those who have been killed or brainwashed to keep these events secret from humanity.

Alien Bodies Recovered From UFO Crash Retrievals

The following is a preliminary list of UFO crashes throughout the world. Currently, little is known about most of these crashes

Most physical evidence of these crashes has been confiscated by the government; however, not all evidence is in their possession. In the past, the government's central archive of UFO wreckage was Wright-Patterson Air Force Base, Dayton, Ohio. It has been reported that most of the alien bodies have been sent to Great Britain for storage and examination.
