To: [redacted]

Subject: ET Evidence

I'm sure you are aware of the Shag Harbour incident in Nova Scotia in 1967 but am passing along this info anyway in case you haven't read the book *Dark Object* - the world's only Government-Documented UFO Crash by Don Ledger and Chris Styles. There are some pretty compelling facts in this little book including copies of official government and police documents appended at the end. I'm sure either of the authours would be willing to talk to you about and share such in the name of disclosure. I know Stanton Friedman has been on top of this for years as well since he makes it to the UFO conference every year in Shag Harbour.

Anyway, just in case you missed...which I'm betting you haven't but all the same it doesn't hurt to forward. Perhaps there are new details around this case that need to be looked at now.

Good luck with the documentary...there are many of us cheering you on and ready to help with the promotion.

Much success and many blessings.
