Dr. Greer

I spoke to you yesterday and just want to sent a few of my details over as shown above. I would like to join CSETI a.s.a.p. and will apreaciate it if you send me some info. I would like to know a bit more about upcoming events for the next few months. Like I said to you I am very interested in putting my weight behind CSETI and help with what ever I can especially with the disclosure project. As you know I am going to Dublin next week for what I see as the most important meeting of my short career on this subject, but I am not going back and the only way is forward. Will come back to you with my findings as soon as I return. I also want to give you a few things to take up a bit further if you have time.

the insedent in South Africa was code name "SILVER DIAMOND" we believe. ON the 7th of May 1989 2 Mirage fighters were scrambled to intercept a object tract by NORAD and shot down with a experimental maser cannon about 80 km north of the Botswana border. 2 EBE's were captured and transported to Pattersons on 23 June 1989 with the crashed causer.

Now Dr. Greer you have more contacts than me, probably at Pattersons, were you can get answers. Will send you more details if you like but this is the big one for me because it happened right there in my back-yard and want to get this out in public.

Will give you a ring when I return. Thank you again for what you are doing and believe in.

Bae N Morse
