□ □

Steve,

Malcolm Hathorne is a local host here on public access TV who has a deep interest in all things UFO. I hadn't heard of this incident this recently.

Best regards,

Interview With General Who Shot Down Spherical UFO Over South Africa

I woke up at about 5:15 AM and turned on the radio and Art Bell was interviewing a former South African colonel or general who had been involved in the shooting down of a spherical UFO. He said there were little gray aliens onboard and it took place about ten years ago, I believe. It was a rivetting interview and it just now ended. Anyway, Bell kept interrupting the guy while he was describing, thoroughly, what all had happened. It was very annoying. And then the show ended as time had run out (at 6 AM). This guy needs to be interviewed in detail immediately, like tonight, before the story goes cold or he is silenced in any way. I have to say that Art Bell just really needs to get his act together because this is so typical of him. He has such a frivolous, nonsensical approach to things sometimes. I hope to heck George Noory or somebody gets this general back on immediately so we can get the rest of

the story. He sounds totally legitimate and it is the first time he has spoken out. The story is HOT... Look, sorry about my criticism of Art Bell. I like the man and he has done a lot of good, no doubt, but sometimes he just does some very irresponsible things... The object was flown to Washington DC where Americans took over. There is so much more to be gotten from this and it is super important. This case could be dynamic in ripping the lid off the coverup. It needs to be followed up immediately.
