

in the United States, whose director is..." (A/SPC/32/PV.35 - Dec.1, 1977. Pp.13-15). Remarkable that Prime Minister Gairy and his delegation were so far terrorized by the ex-US governmental scientists that one year later they keenly avoided mentioning ICUFON in their statements, although on October 9th three complimentary copies of the Memorandum were passed over to their New York Hilton headquarters.

On October 5, 1978, ICUFON-DUIST-IGAPE historical Memorandum addressed to the United Nations General Assembly, Thirty-Third Session and its Special Political Committee, was presented to all the 149 Ambassadors of the United Nations.

The 90 pages Memorandum exposed declassified governmental and military evidences, military, scientific and technological analyses of photographed/filmed alien crafts, verifying with them:

- THE ENDANGERED INTERNATIONAL PEACE AND SECURITY BY ALIEN TASK FORCES OF OUTER SPACE ORIGIN, - FORMALLY TERMED AS UNIDENTIFIED FLYING OBJECTS, UFOs: a n d
- NATIONS' ARMED OFFENSIVE-DEFENSE CONFRONTATION TO SUPERIOR GALACTIC POWERS EARTHBOUND OPERATION, WHICH JEOPARDISE THE PRESENT LAW AND ORDER AND RAISE A POTENTIAL THREAT TO THE CIVILIZATION.

Between October 11th and November 26th (before Prime Minister Gairy's address to the General Assembly, and the meeting of the Special Political Committee) the Memorandum was duly delivered to the diplomatic correspondents of the world's news media with the United Nations Secretariat.

CENSORSHIP IN ACTION

The Bill of Rights of the United States of America, in legal force from December 15th, 1791, in its Amendment I. strictly determines:

"Freedom of Speech, of the Press and Right to Petition. Congress shall make no law abridging the freedom of speech or of the press;..."

It may happen that in the birth-place of "FREEDOM OF THE PRESS" a top priority news item could be totally

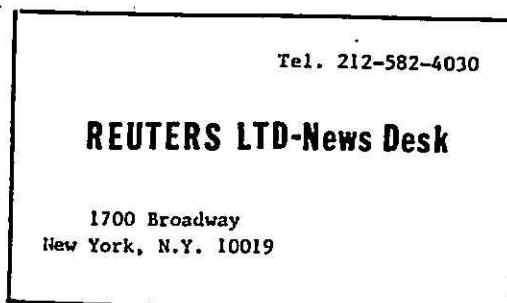

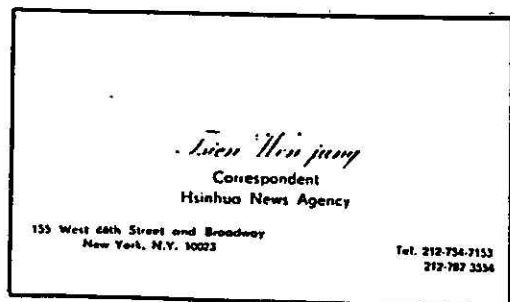

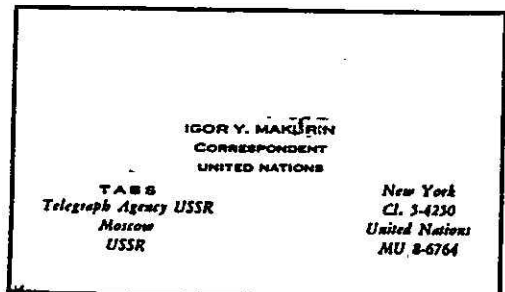

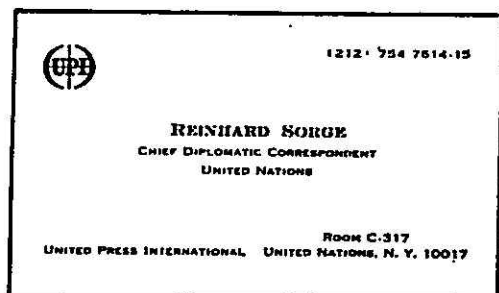

CENSORED

SUPPRESSED

and

SILENCED

before the public? - Would the world's nations rather read media favorized scientists' confusing explanations before the the United Nations about the UFOs "BEYOND RELATIVITY", than be informed about the governments and their armed forces thirty years plus concealed and recently declassified evidences for the public?!

Jerome EDEN, journalist and and science writer properly

LB

characterized the contemporary public information services: "...the purpose of the "News Media" i.e., The New York Times, TV, Radio, et all., is NOT to report vital information—it is to make money. Reporting "News" is always secondary to keeping advertisers happy. This story - and stories just like it printed in local papers during the past several years - are rightfully Top Priority Newstories. UFOlogy is the idiot child of the News Media, a source for clever clips & stupid jokes, not to be taken seriously - like Wilhelm Reich & Orgonomy." (EDEN BULLETIN)

The diplomatic correspondents of the United Nations Secretariat were startled without exception by the Memorandum's impressive declassified UFO evidences, and wired their agencies in New York City immediately from the Secretariat. But the news agencies: The Associated Press (AP), United Press International (UPI), Telegraph Agency USSR (TASS), Reuters Ltd. London, Hsinhua News Agency (HNA) China, and The New York Times had in unison censored and silenced the correspondents' report and never communicated with their news papers and magazines.

An indication of this existing "SILENT CENSORSHIP" in the U.S.A. controlled by unidentifiable top level governmental authorities is proven by the following classical evidences:

1.

The Associated Press

The presented media-report (on the right) was written on October 11, by diplomatic correspondent William N. OATIS, and was teletyped from the U.N. office by John BAUSMAN, Chief of World Desk on the same night to the A.P. Hq. 50 Rockefeller Plaza, New York City.

ICUFON's Memorandum was banned and instead the ex-governmental scientists obscure interpretations were wired world wide.

Associated Press Writer

UNITED NATIONS AP - Sir Eric M. Gairy, prime minister of Grenada, headed for the rostrum of the General Assembly today to put in a word for his proposal that a U.N. unit be set up to study unidentified flying objects.

His special head-of-government speech to the 15-nation assembly scheduled for the forenoon was expected to be devoted largely to that subject, which is already on the agenda and due for debate in late November in the assembly's special political committee.

An associate in his campaign meanwhile promoted the idea by circulating to U.N. officials and delegates a thick file of material including a signed statement by Jimmy Carter, now the president, about seeing a UFO in Georgia nine years ago.

The associate was a Hungarian-born New Yorker, Colman VonKeviczky, director of the Intercontinental UFO Galactic Spacecraft-Research and Analytic Network, or ICUFON.

He included Carter's statement in an 87-page collection of material on UFOs, consisting largely of declassified U.S. government documents, that he distributed in advance of, and in support of, Gairy's appearance.

The presidential entry was a report on unidentified flying objects on a form provided by the National Investigations Committee on Aerial Phenomena (NICAP) in Kensington, Md.

Carter had filled it out the form and signed it in Atlanta on Sept. 18, 1973, when he was governor of Georgia, but it told of something that had happened at Leary, Georgia, four years earlier, in October 1969.

He said that at 7:15 p.m. that night, shortly after dark on a starlit but moonless night, he and 10 other members of the Leary Lions Club saw a luminous object as bright as the moon but maybe a little smaller that appeared in the west about 3 degrees above the horizon.

The object, Carter wrote on the form, changed size, brightness and color; came close, moved away—came close then moved away, and finally, moved to distance then disappeared.

Carter did not answer questions on the form as to his feelings about the sighting and as to whether he thought the object was an extraterrestrial device, UFO, planet, star, satellite, hoax or airplane, but said there was no airport nearby.

The declassified government reports included in VonKeviczky's file, while describing UFOs sighted, either did not contain any conclusions as to their nature or else concluded that there was no evidence they came from outer space.

But also included were news stories that in 1967 a Brazilian, in 1968 a Colombian and in 1973 two Finns died from radiation emitted by strange hovering objects, in two cases with man-like creatures aboard.

And VonKeviczky presented the theory that UFOs were spacecraft of galactic origin reconnoitering for eventual permanent landing at unknown time, location and for unknown reasons.

He suggested that the United Nations sponsor an international UFO congress to consider whether UFOs really were space vehicles of advanced civilization verified as extraterrestrial, how dangerous they were and what security measures should be taken to avoid a fatal confrontation with galactic powers.

Gairy got UFOs on the agenda of the 1977 assembly but the only result was an agreement that any countries that might wish to send Waldheim any information or ideas on the subject could do so. Waldheim never reported whether any had—he was not required to—and so Gairy proposed the same general subject for consideration again this year.

End
Gairy
