

Q U O T E S

"If suddenly there was a threat to this world from some other species from another planet, we'd forget all the little local differences that we have between our two countries, and we would find out once and for all that we really are all human beings on this Earth together."

*President Ronald Reagan,
to Mikhail Gorbachev, Geneva Summit
Dec. 5, 1985*

"In our obsession with antagonisms of the moment, we often forget how much unites all the members of humanity. Perhaps we need some outside, universal threat to make us recognize this common bond. I occasionally think how quickly our differences worldwide would vanish if we were facing an alien threat from outside this world."

*President Ronald Reagan,
42nd General Assembly of the United Nations
Sept. 21, 1987*

A Question of Motive

By Bruce S. Maccabee

If Admiral Hillenkoetter was part of MJ-12—a group sworn to secrecy about the crashed disc(s), then why did he join NICAP (National Investigations Committee on Aerial Phenomena) in 1957? I speculate that it was because (a) he knew for a fact that flying saucers were real and piloted by intelligent entities and (b) he did not agree with the policy of continually keeping UFO information from the general public and the scientific community. I think he wanted to use his reputation and "voice of authority" to alert the scientific community to the reality of the saucers. He could not alert the scientists and the public by revealing the top secret information about the crashed disc(s) by himself. To do that, he would have had to convince all of the MJ-12 members and also the top advisors to the President that the information should be declassified. Evidently he

was not able to do this. I believe instead he decided to offer his public support for the endeavors of a highly credible civilian UFO organization.

The fact that he and several other Navy admirals were members of NICAP's Board of Governors gave NICAP a level of credibility unmatched by any other pro-UFO organization since then. These men and the other well-respected members of the NICAP Board of Governors allowed their names to be entered into the Congressional Record as being in favor of releasing the secret information to the public. In 1960, Hillenkoetter stated publicly that "behind the scenes, high ranking Air Force officers are soberly concerned about UFOs. But, through official secrecy and ridicule, many citizens are led to believe the unknown objects are nonsense."
