Don't tell the CIA but generals have proof ET exists and wants to make contact

A UNIQUE event will take place in Washington DC next Wednesday. More than 20 witnesses from respected professions are joining forces to reveal to the world's media what they claim to be the deception of elected governments by unaccountable but powerful self-interest groups.

In any other field, such as pollution scares or political scandals, these witnesses - senior military officers from the US, UK and Russia, decorated pilots and astronauts, reputable scientists, and even a Cardinal from the Vatican

By

Glick**

- would be taken seriously. People would be clamouring for an open inquiry.

But the subject of this press conference will stretch the imagination of many. The witnesses will claim that not only does life exist beyond this planet, but that there has been contact between us and them. They will allege that this knowledge has been suppressed even though the advanced technologies could benefit mankind.

And they will claim that agencies - operating outside the constitutional chain of command in the US, UK and other countries - have been frustrating the inquiries of elected heads-of-state, leaders of the armed forces and the United Nations. It sounds like a case from The X-Files.

That these claims are taken seriously and properly investigated is the hope of Dr Steven Greer, director of the Disclosure Project, who is hosting the event. Dr Greer is the international director of the Centre for the Study of Extraterrestrial Intelligence (CSETI), a non-profit scientific research organisation that was set up in 1990 to "establish peaceful and sustainable relations with extraterrestrial life forms".

Several years ago, the Disclosure Project invited experts from "military, government or government contractor personnel" who were witnesses to UFO events and projects to make statements about what they know. Around 400 came forward and more than 100 have had their testimonies videotaped by Dr Greer, who says they will establish once and for all that we are not alone.

ONE key witness attending the event is a former Division Chief of the Accidents and Investigations Branch of the US Federal Aviation Authority. In his testimony John Callahan tells about a 1986 Japanese Airlines 747 flight that was followed by a UFO for 31 minutes over the Alaskan skies. The UFO also trailed a United Airlines flight until the flight landed. There was visual confirmation as well as air-based and ground-based radar confirmation.

This event was significant enough for the then FAA Administrator, Admiral Kington, to

hold a briefing the next day attended by the FBI, CIA, and President Reagan's Scientific Study Team. Videotape radar evidence, air traffic, voice communications and paper reports were compiled and presented.

At the end of the meeting, a CIA member instructed everyone present that "the meeting never took place" and that "this incident was never recorded".

"At the time I said, 'Well I don't know why you are saying this,' remembers Callahan. "There was something there and if it's not a stealth bomber, then you know it's a UFO. And if it's a UFO, why wouldn't you want the people to know? They got all excited over that - 'You don't even want to say those words'. He said this is the first time they ever had 30 minutes of radar data on a UFO. He said if they came out and told the American public that they ran into a UFO out there, it would cause panic across the country.

But as far as I'm concerned, I saw a UFO chase a Japanese 747 across the sky for over half an hour on radar. And it's faster than anything that I know of in our government."

Project director Dr Greer claims that "technologies related to extraterrestrial phenomena are capable of providing solutions to the global energy crisis". His aim is to persuade the US Congress to hold open hearings at which a further group of "deep cover" witnesses could testify with official government protection. During

his investigations, Dr Greer and his team have briefed the Clinton administration, including former CIA director James Woolsey, senior military officials at the Pentagon, and selected members of Congress.

Whether any of these sensational claims are true or whether it's a conspiracy theorist's version of the Hitler Diaries remains to be seen. The provenance of the witnesses will certainly be verifiable.

BUT who is Greer? He is a 45-year-old medical doctor from Virginia who has spent eight years and \$5million of his own money putting together the evidence the Disclosure Project will begin to unveil next week.

It started for him at the age of eight, when he claims to have seen a UFO in broad daylight. His interest further developed when his uncle became a senior project engineer on the lunar module that took Neil Armstrong to the Moon. This gave him the insider knowledge he needed to pursue a lifetime of study into the possibility of extraterrestrial life.

Dr Greer and his small research team have spoken to witnesses all over the world, many of them high-ranking military personnel who have stated unequivocally that they have seen UFOs.

"Sceptics say they are deluded, or liars. But in any other circumstances they would be considered heroes of their country," Greer said.

"These are individuals in whose hands rest the nuclear arsenals of the world - launch control officers who we trust with the safety or destruction of our planet. Either these military men were hallucinating, or they saw what they saw."

The chilling truth, as Dr Greer sees it, is that the testimony of his military witnesses will show that the US and other countries have engaged "extraterrestrial vehicles" in armed attack.

"If there is even a 10 per cent chance that this is true, then this constitutes the gravest threat to world peace in human history," he says.

His witnesses are impressive. They include Britain's former Chief of Defence Staff, Admiral Lord Hill Norton, who states in his testimony, "...that there is a serious possibility that we are being visited - and have been visited for many years - by people from outer space, from other civilisations; that it behoves us to find out who they are, where they come from, and what they want. This should be the subject of rigorous scientific investigation."

The consensus among those in the know, says Greer, is that we

are not facing hostility from extraterrestrials. He is extremely concerned, therefore, about President Bush's announcement that he is going ahead with NMDs, the National Missile Defence System, a hi-tech space defence shield.

"Our visitors may be quite neutral but they may not be so happy about our military adventures," he says.

ACCORDING to Dr Greer, secrecy is preventing the world from entering into an informed debate about NMDs, not to mention environmental and energy issues. And he's talking about levels of secrecy that have even removed presidents from the loop.

"The buck supposedly stops at the Oval office, but it seems like it doesn't. Carter and Clinton were deliberately deceived - it's explosive, but we know this to be the case."

Dr Greer is aware he is making serious allegations. Why should anyone believe him? "I'm a licensed MD in two states. If I were perpetrating a hoax I would lose those licences and my livelihood. We have three attorneys here too - if they were hoaxers they would be disbarred. There's a lot at stake here."

A sceptic, Professor Archie Roy, Professor Emeritus of Astronomy at the University of Glasgow, says that although 80 per cent of UFO sightings can be identified as astronomical objects, satellites or conjunctions of planets, about 20 per cent cannot be explained away. "The whole UFO thing has developed very much but has been muddled by hoaxes," he says. "I'm not saying all cases are hoaxes but the Roswell mythology has made it pretty much impossible to get to the truth now."

So, just as the British Flying Saucer Bureau closes its doors, leaving more than 100 similar UK groups to carry on, some experienced eyes will be turning to the USA this week.

Nick Pope, former UFO desk officer at the Ministry of Defence, says: "Those people who have genuinely been involved in government or military UFO projects undoubtedly have fascinating stories to tell. I

hope people will pay attention and realise that the UFO phenomenon raises some serious defence and national security issues."

Dr Greer hopes that "serious media interest" will provide the impetus politicians need to lobby for an official inquiry.

"All I'm asking is that we spend a fraction of the time on this that we

did on Monica Lewinsky. If only one of these witnesses is telling the truth, it's the biggest story in history."

There will be a live web cast of the press conference from 2pm on Wednesday, May 9, on www.connective.com/events/disclosureproject.

Additional reporting by Hamish MacKerrall

Invasion of 600 UFOs

MORE than SIX HUNDRED flying saucers have been spotted in Britain's skies over the past three years.

Latest Ministry of Defence figures show that, in 1998, 193 UFOs were reported - with another 229 in 1998 and 210 last year.
