AMERICAN SCIENTISTS DEMAND TO PUBLISH THE INFORMATION ABOUT UFO ACCUMULATED DURING 50 YEARS

A group of American scientists and retired militaries called "Declassifying Project" launched a campaign for audition of UFO issue in the US Congress. The members of this group propose to listen the evidences of extraterrestrial existence. The group accuses the American government of the attempt to restrict information about UFO which had been accumulated during the recent 50 years.

Doctor Steven Greer, one of the leaders of "Declassifying Project" explained why the American government could hide such information: "During the cold war this information was secret, because our government did not want the Soviet Union to obtain admittance to the extraterrestrial technologies. But the cold war had not ended till now. Our government is still keeping this information in secret. Probably there are many projects which conflict with our constitution and have not been discussed in the Parliament and in the White House. Maybe the authorities are not ready to admit it."

One of the members of "Declassifying Project", a former military announced, that he had taken part in a group for investigation of a wrecked flying saucer where he had found wounded extraterrestrial astronauts, as BBC reports. According a lady taking part in the Project, one of the American astronauts who had visited the Moon told her about the print of an extraterrestrial space ship left on the ground of this planet. For the time being there is not any reaction of the American authorities to the announcements of the group.
