

  
The Turner Foundation, Inc.  

Dear Sirs or Madams:

I write to you in hopes of attracting your attention and concern to a project that holds enormous promise for health of the environment and quality of life for people around the world. It will take someone of Ted Turner's stature and commitment to bring it to effective public attention. And so I ask that you read the few pages that I enclose. \*

The project spokesman is Steven Greer and the objective of the project is for Congress to hold hearings whose consequences can profoundly impact the global environment and world health. I have been in the audience for two of Steven Greer's presentations and have watched the full video of his National Press Club interviews of highly credible people. He is totally sincere and fully committed to the work that he and his wife now do together to bring earth-saving technologies to public attention. This could not be more important.

A good starting point, to arouse public interest and requests of Congress members for full hearings, would be either or both of a CNN program focusing on the information and issues surrounding this project and a film honestly and thoroughly researched by as skilled a producer as Michael Moore.

If I can be of further assistance, in providing information or contacts, please phone, e-mail or write.

Very sincerely yours,

*H. Jean Thiebaut*
