

FLIGHT CREW FLYING SAUCER SIGHTING

(MARCH 21, 1950 STUTTGART ARKANSAS)

SIGHTING TOOK PLACE AT 9:29 PM, 15 MILES NORTH OF STUTTGART ARKANSAS
OBJECT HAD CONVENTIONAL LOOKING GREEN AND RED RUNNING LIGHTS
SIGHTING TOOK PLACE AT AN ALTITUDE OF 2,000 FEET
THE CRAFT WAS FLYING AT TREMENDOUS SPEED (600 MPH) AND LEFT NO VAPOR TRAIL
BOTH PILOTS COULD SEE 10 ILLUMINATED CIRCULAR PORTS ON THE BOTTOM OF THE CRAFT

"WE FIRMLY BELIEVE THAT THE FLYING SAUCER WE SAW OVER ARKANSAS MONDAY NIGHT WAS A
SECRET EXPERIMENTAL TYPE AIRCRAFT, NOT A VISITOR FROM OUTER SPACE."
(CAPTAIN JACK ADAMS AND FIRST OFFICER G.W. ANDERSON)

"I BELIEVE IT WAS SOME KIND OF EXPERIMENTAL TYPE AIRCRAFT THAT HAS BEEN KEPT A SECRET
BY THE AIR FORCE, IT WAS DEFINITELY SOME KIND OF AIRCRAFT IN CONTROLLED FLIGHT MOVING
AT TREMENDOUS SPEED" - CAPTAIN JACK ADAMS

'Saucer' Experimental Aircraft, Not Space Ship, Air Pilots Say

(Editor's Note: Flying saucers have been reported frequently since the end of World War II. The Air Force has officially discounted them, saying they do not exist.)

(Two veteran Chicago & Southern Air Lines pilots say they saw one Monday night. The airline says they are responsible officers. Their story is considered one of the most thorough descriptions yet of the mysterious objects.)

By CAPT. JACK ADAMS and
1ST OFFICER G. W. ANDERSON
(As Told To United Press Staff
Correspondent William J. Fox)

MEMPHIS, Tenn., March 21.
(UP)—We firmly believe that the "flying saucer" we saw over Arkansas Monday night was a secret experimental type aircraft—not a visitor from outer space.

We have been fooled by meteors before and we are certain this was

no meteor. It was an aircraft in controlled flight, traveling at a terrific speed. It was not a jet plane.

It was the speed which first attracted our attention. That, and the strangest, strongest blue-white light we've ever seen, which blinked very rapidly on top of the object.

We were headed for Little Rock on the first leg of our trip to Shreveport, La., and Houston, Tex.

Jack was at the controls and we were headed west, about 15 miles north of Stuttgart, Ark. Visibility and ceiling were unlimited and we could see 20 or 30 miles. There was only a small piece of a moon and the night was dark and beautiful. We were flying at 2,000 feet altitude.

Suddenly, Jack saw this intense blinking light at our left. It was about 1,000 feet above us and about a half mile away. It zoomed at terrific speed—500 to 600 miles an hour—in an arc ahead and above us moving from south to north.

"My god, what's that?" Jack exclaimed, nudging Andy. Andy looked and saw the fast-moving object and

said, "Oh, no. Not one of those things!"

We'd read about flying saucers and were as skeptical as most people. But when you see something like that, what can you do but believe your eyes?

This object remained in full view for about 30 seconds and we got a good look. It had no navigation lights, but as it passed ahead of us in an arc we could plainly see other lights—as though from eight or 10 lighted windows or ports—on the lower side.

The lights had a fluorescent quality. They were soft and fuzzy, unlike any we'd seen before. The object was circular and remained distinct all the time it was in our view. It approached and disappeared just like another aircraft. The time was exactly 9:29 p. m. CST.

We blinked our landing lights in a recognition signal. We didn't know what to make of it, but we almost immediately eliminated military or other civilian aircraft because none that we know of looked like this thing. It was about the size of a DC-3.

There was no reflection, no exhaust and no vapor trail. That's definite.

We didn't tell the passengers. Stewardess Jane Lovelace was skeptical at first, but now she believes us.

We gave a routine position report to the control tower at Little Rock, and then added somewhat jokingly that we'd seen a saucer.

We know the Air Force has denied there is anything to this flying saucer business, but we're both experienced pilots and we're not easily fooled.

Jack has flown more than 7,000 hours and Andy more than 6,000. Jack has been with G. & S. since May 15, 1943, and this is Andy's fifth year with the line. Jack is 31. Andy is 30.

Jack is a native of Little Rock, who instructed pilots as a civilian during the war, flew cargo planes and is co-owner of his own airplane farm dusting service. He is married and has a young son.

Andy is a native of Gate City, Va., is married and has a 10-year-old daughter. He flew the hump from India to China during the war.

Together we've flown and instructed in such ships as C-46s, C-54s and C-47s. We're both church members and we're God-fearing citizens. So we have no reason to succumb to the Air Force's "mass hysteria" or to make up a story.

We can't blame anyone for believing these things exist. On our way here today, we were notified by radio that Air Force Intelligence wants to talk to us.

Sticks To Tale Of Seeing Real Flying Saucer

Memphis, Tenn., March 22-(AP)-The airline pilots who reported a flying saucer over Arkansas insist that "what we saw was not a meteor, a jet or something imaginary."

Capt. Jack Adams said here yesterday "I believe it was some kind of experimental type aircraft that has been kept a secret by the Air Force. It was definitely some kind of aircraft in controlled flight moving at tremendous speed."

Adams and Co-Pilot G. W. Anderson radioed a report of the strange object Monday while approaching Little Rock, Ark.

"We've heard and read a lot about flying saucers and were as skeptical as anyone else," Adams said, "but when you see something with your own eyes, you have to believe it."
