

Strange craft reported over Brighton Michigan

On the night of November 27, 1991 (8:15 PM), two eyewitnesses reported seeing a very unusual light grey colored craft flying over Brighton Michigan. The UFO resembled two semi-circles, connected by a rectangular shaped beam. Two small white lights were seen on the edges of the semi-circles, and a series of approximately thirty red lights were located on the front of the object. The craft flew silently at an altitude of approximately 1,000 feet. As it emerged from a low cloud, the eyewitnesses heard the loud roar of a jet engine indicating that it may have been escorted by a military jet, or that it may have utilized a secondary propulsion system. Its estimated size was between 300 and 500 feet across. The UFO was travelling at a speed of 75 mph, and was headed in a north-east direction towards Detroit. Total duration of the sighting was one minute and thirty seconds. Source: CUFOS archives
