

Dr. Dyneb -

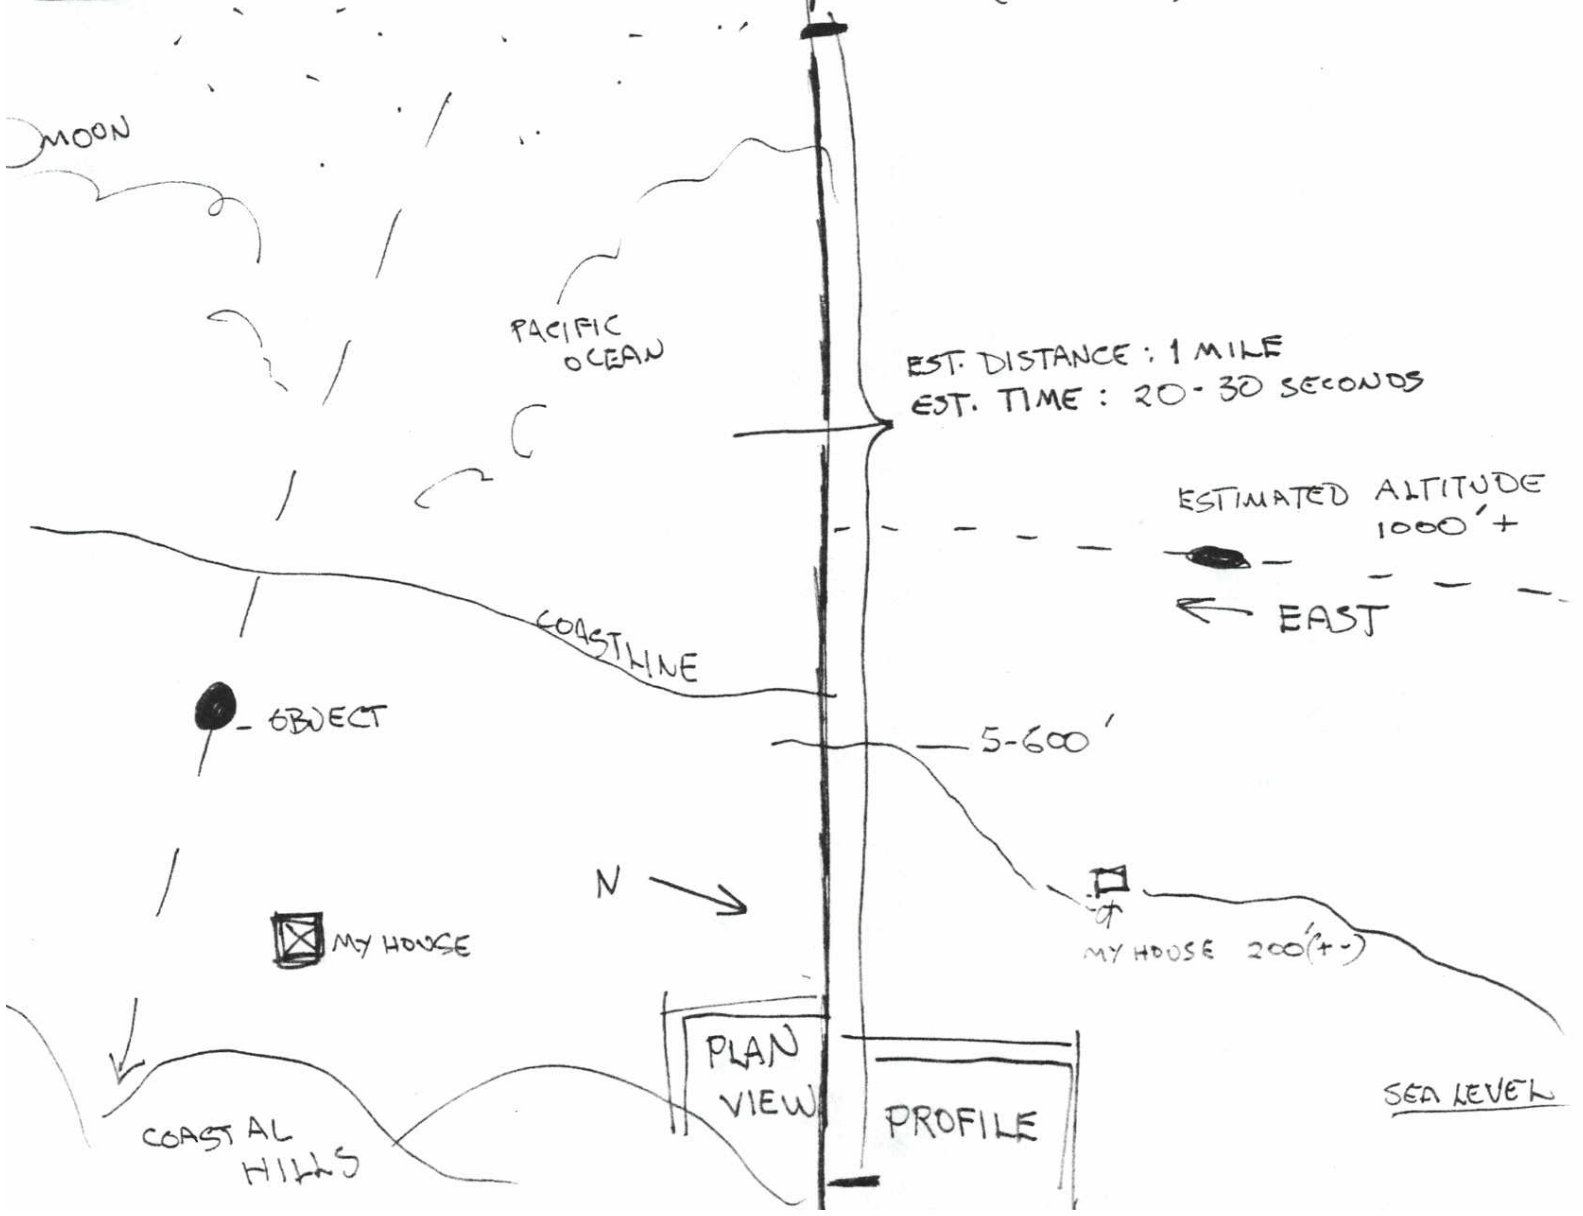

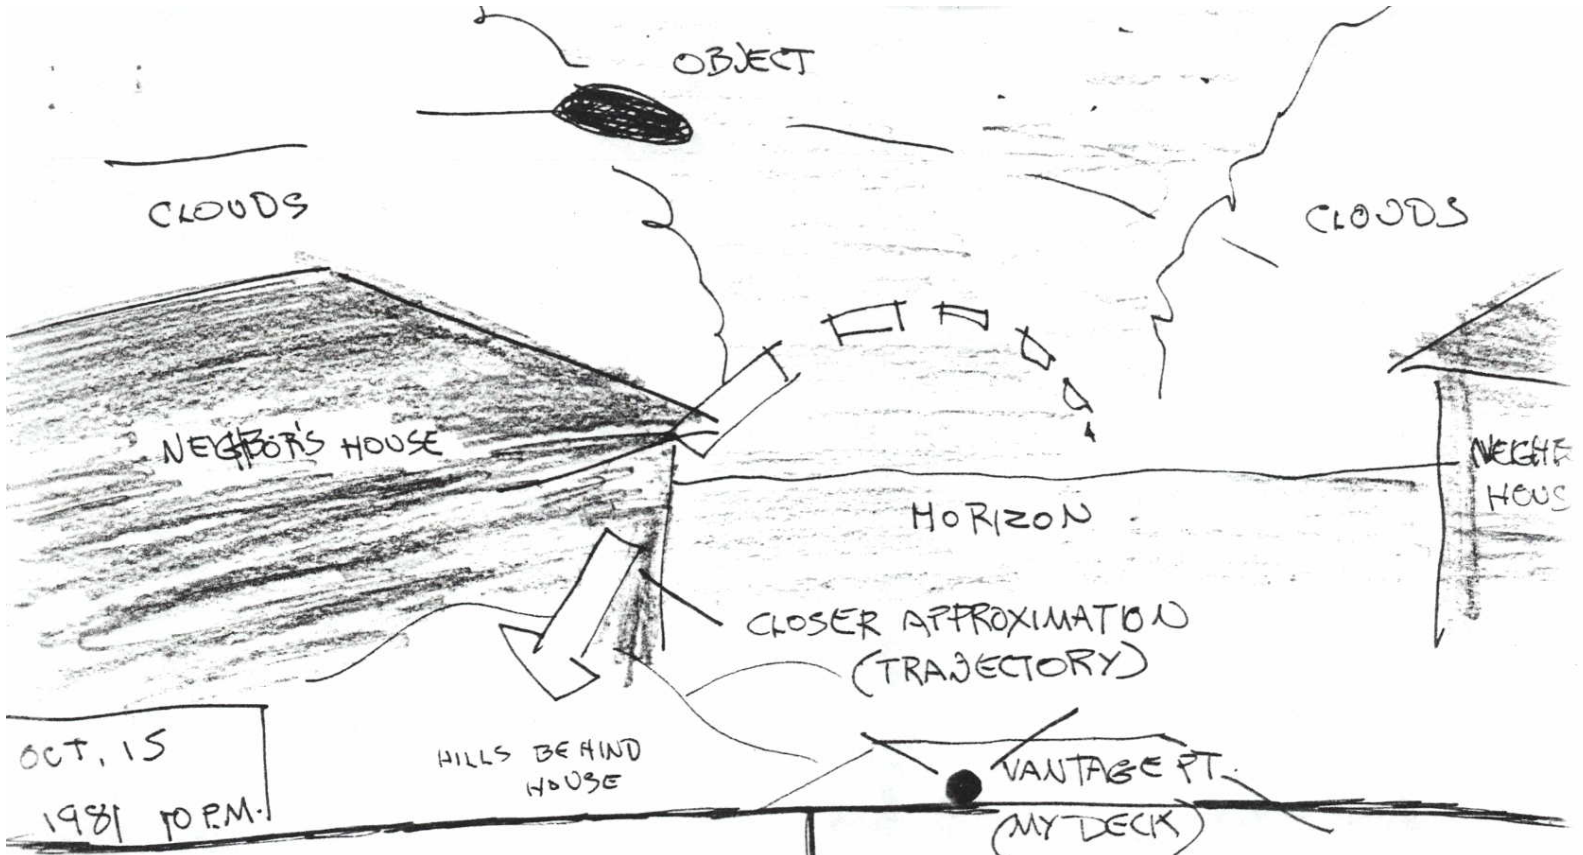

To begin, it was a privilege & a pleasure to speak with you regarding my encounter. You are the first scientist (ufologist?) that I have spoken with about this sighting — and I'm glad that someone takes the matter seriously! The reason I have delayed in sending you sketches, information, etc. is that I wanted a photo of the full moon under similar circumstances — this will be forthcoming, for what it's worth.

Anyway — enclosed are some very rough sketches. I hope they are helpful. To reiterate our conversation...

10 P.M. OCTOBER 15, 1981. I was sitting on my front deck in S. Laguna, Calif. I was on a strict diet at the time and had not been drinking or smoking it. There were cloud banks to the left, and the right. Up the middle towards the horizon (due west) ^(South) it was clear, with stars visible. I was looking at the ^(full) moon coming up over the cloud bank (to the left [south]) when I noticed a flying object approaching off the horizon and up the clear swath of sky in the center of my vista. Still only peripherally aware of the object — I thought that it might be an owl. On second glance I thought it might be a satellite. But in a matter of seconds (by the time it was close enough) I dismissed both of these possibilities.

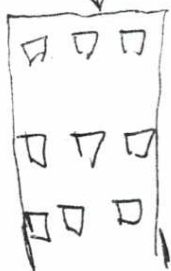

it emitted no sound (it was a day over evening) and
no light. It appeared to be backlit by the
moon - which gave it an eerie aura. I would
like to revise my estimation of size or speed.
I've given this a lot of thought. The object appears
to be about the size of a silver dollar. It moved
silently but briskly - covering perhaps 1 mile in
20 to 30 seconds. I think the probable altitude
(maybe like a twin engine Cessna),
to have been 1000' +/- (as it disappeared over
the hills behind my house with several
hundred feet to spare). I'm not sure (of course)
but the object had to be between 50 & 100 feet
in diameter). It was close - close enough to
convince me that it couldn't have been anything
else - not a frisbee, a balloon, a weather phenom
or anything else in my experience. I am
~~convinced~~ that this was some sort of
extraterrestrial craft! I hope that I am
making a worthwhile contribution here. I will
send a photo with the moon & clouds in similar
alignment and I sincerely wish that I
will hear from you. Thank you:
