

hear a faint humming sound. The bottom was all lighted up with yellow lights -- large, except across the middle where they were small. Now, here comes the unbelievable part -- there were black symbols running across this yellow field (like that sign on Times Square). When I saw this, my mind just jammed up because it was so unexpected and out-of-keeping with the beauty of the thing. I guess I went into shock because I didn't see it leave the yard. My son says it went out into the front yard, turned red, and sped off across the highway."

"During the time it was in the yard, Terry ran into the house and called Mrs. Ashbacher to come over and see it. Unfortunately, she didn't arrive in time. No sooner had it left than the police arrived. You can imagine how strange my tale sounded. One policeman looked at the other one and said, 'Do you believe that?' Nothing is more frustrating than to tell the truth and no one believes it. I told them that Terry and I had seen UFOs all evening, coming over the treetops behind the horse farm (Southeast) and passing over the church, and then heading northwest toward the lakeshores. I asked them why we were supposed to call them anyway. What could they possibly do if one was sitting in my backyard? They said they had to confirm it and then the information was sent to the military, who in turn, would send up planes or helicopters to investigate. Being familiar with the government stand on UFOs, I decided not to ever call the police again, and I didn't."

"Mrs. Ashbacher sat with us on our front porch while the police car parked in the churchyard and waited 15 or 20 minutes. Nothing happened, so Mrs. A. went home and the police left.. They hadn't gotten $\frac{1}{2}$ block away when 2 UFOs zipped across the sky at the same time. I said, 'Terry, I think they are trying to make fools of us'. He said, 'No UFO is going to make a fool of me', and he went and got the camera, a Polaroid 320. I only had one picture left in it, but he got a good enough shot, that I called the police back and gave it to them, just to prove we weren't crazy. (I discovered later that they still didn't believe it and never turned the report in to the Central Bureau.)

"Mrs. Ashbacher is in a carpool with other teachers who teach at Princess Ann School. On the way to school the next day, she told

very enthusiastic. Immediately after they drove off, Terry said, 'Look, mom, there's another one!' Sure enough, about a block north of us was another UFO -- a double decker lighted up with the white lights. After that there was no holding us. We sat on the front porch and watched with amazement, while we spotted one after another. Some had red lights and some had white, and they changed from one color to the other while in flight. Some were double deckers and some single. The sky was so filled with them that the area looked like an airport. We must have seen 25 or 30."

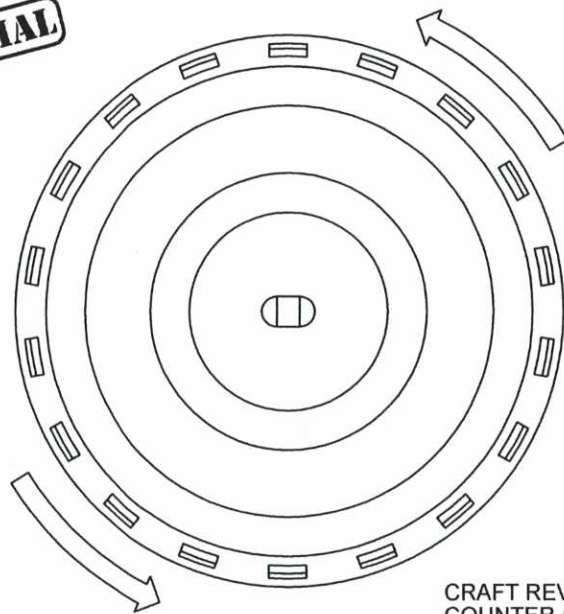

"The front of our house overlooks a dual lane Boulevard, a large churchyard, and a horse farm, so we had nothing to obstruct our view. And our home seemed to be located right in the center of their activities. We never saw any appear before 5:00 PM either during or after the first flurry of sightings."

"Terry wanted to tell someone about it, so he ran to Mrs. Ashbacher's house (right behind us). She is a school teacher and good friend. She told him he should call the TV station WMAL and tell them about it. He did and they said to notify the police, which we did. While we were waiting for the police, I went in to fix us something to eat and Terry stayed outside. Suddenly, he started screaming hysterically, 'They're after me! They're coming to get us! They're after us!' I ran out and found him standing at the corner of the house, staring at a bell-shaped object that had dropped down into our backyard, in a corner where our neighbor's fences come together. It was the most beautiful thing I have ever seen! It had a light on top that blinked on and off slowly -- first red, and then white. It had square windows around the bottom, and through these windows glowed a moving phosphorescent light. It was like a diamond, with sparks of color in it. The object revolved in a counter-clockwise direction, even while it was going through all kinds of maneuvers. It appeared to be about 4 or 5 feet tall and wide. However, I got the impression that it was remote controlled. It swung back and forth, like a bell, then up, so that the lights formed a bracelet, then to the side, so that the lights formed a boomerang pattern. It went up and over our neighbors fence and maneuvered all over their backyard also. Then it came back over the fence, right above my head. It never made any sound, but when it was directly over my head, I could

UFO CASE FILES REVEALED PART 11

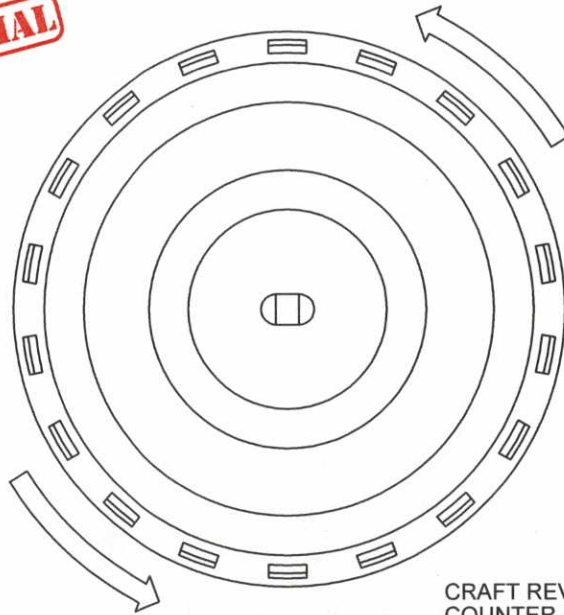

Virginia Beach VA. November 6, 1976 – Mrs. Barbara Nielsen spotted a bell shaped UFO which hovered approximately two feet off the ground in her backyard. The craft had a light on top that blinked on and off slowly from red to white. It had rectangular windows near the bottom which emitted a phosphorescent light. The object rotated in a counter-clockwise direction, while it tipped up along its vertical axis. The UFO measured five feet high, and five feet wide. The primary eyewitness noticed a faint humming sound emanating from the craft. The bottom of the object was comprised of multiple yellow colored lights. There were black symbols running across the center section (similar to the “newsflash” text seen in Times Square).
