Subj: **Many watch UFO try to land.**

[redacted]

ILLINOIS HUGE CRAFT ATTEMPTS TO LAND

DOWNERS GROVE – [redacted] sent an e-mail stating, "I am writing to you about an occurrence outside our corporate building where I am the admin for the management office. Everything I have to say in second hand, I have not seen anything myself but, at about 8:00 PM on July 12, 2000, the security guard of our sister building called the security guard of my building and asked, "What are all those lights about?" The sister building is north of us, and the lights were apparently to the south of the building. The guard went out to the south parking lot and saw "a huge object that was trying to land in the parking lot". He said, "It was as long as eight buses, and almost as high." He said it was a dark silver/blue with a goldish strip across it, and underneath looked concave. He said, "The UFO hovered over the parking lot for almost a minute without making any sound." At that time some of our tenants came out because this object was right outside their window. Even the entire cleaning crew saw it as well. Then he said, "The object, this 'silver ball', shot up into the air and off to the west moving so fast it was hard to track." It appeared to pause over the town of Aurora, about 15 miles away for several seconds before departing. What is odd is that none of the tenants will talk, report to the police or the news media. I wonder how many things like this happen, and people just see it, and then go on their way? Thanks to [redacted]
