 r photo #3,
 Wow, 
 Those are really clear.

I'm getting a print-out from [REDACTED] that I'll send to you after I get back from Roswell. (be gone tomorrow through thursday) If you want to use it for the briefing video, contact [REDACTED] at [REDACTED]. Or [REDACTED] should contact him - it needs to go direct from the computer into the video, and not from a print. The print is from a frame of a VHS camcorder so it's not the best - but I'll send it along. Maybe you could get the sequence of the thing in motion from [REDACTED]. The amazing thing is that [REDACTED] says this looks just like the craft that abducted him when he was in the military, and that it would have to be HUGE to show up this size in the image. (although I guess there's no way to determine how far away it is...)
