<< Hi [REDACTED]

My name is [REDACTED] and I am liveing and working at the [REDACTED] house helping with the Disclosure Project. [REDACTED] July 2000 with a military abduction witness now living in Ohio who has been sending him examples of UFO pics he has taken around his home. He has a gigantic library of video footage.

[REDACTED] said the pics and the videos can be dropped into the production. Would you like to go direct through [REDACTED] to gather this evidence or would you like us to collect it from our end and send it on to you. Or have you already discussed this with [REDACTED]>>

Hi [REDACTED]. The video photographer IS [REDACTED] who is also the military abduction witness. I've been in touch with him for a couple of months now and he's sent me over 170 still frames taken from his daylight videos, plus he's also sent me a roll of videotape from which I have been able to extract still pics of UFOs myself by sequencing it onto my computer. I have also printed out the best of [REDACTED] photos and sent them to Steven in hard copy because Steven has trouble downloading pics. Yes, they are very easily dropped into a video production. [REDACTED] will know how to do this in Final Cut Pro.

You need to make sure that [REDACTED] is scheduled for a videotape interview. His 1967 military abduction case parallels the 1977 Fort Benning GA military mass abduction case of [REDACTED] [REDACTED]s in San Diego and needs to be interviewed on Steven's S. Calif. tour around Sept. 6. Make sure [REDACTED] line up [REDACTED] for an interview on the Mid West tour. He is in Ohio.

I'll be happy to answer any technical questions regarding [REDACTED] photos at any time. Please pass this note on to [REDACTED] Steven.

Thanks,

[REDACTED]

Steve, a military abduction witness now living in Ohio has been sending me examples of UFO pics he's taken around his home. He has a gigantic library of video footage. You have a report that I filed on him. The pics and the videos can be dropped into the production. Do you want to contact him directly?

See attached JPEG file
