

Steve,

This witness is providing a videotape for analysis and possible use. I'll forward when received.

The still shots are frames from his VHS videos.

He is told by intuition where to point his camcorder, doesn't see anything with the naked eye, and when he plays back the video, UFOs are visible. This has been going on for years, so he claims. Sounds like CE-5s without a whole lot of overt awareness.

He could be an asset to the whole contact protocol effort, as well as an insightful witness into the military abduction phenomenon.

I'm currently tracking two ancillary witnesses to the Hunter-Liggett military reservation phenomenon, which could be a U.S. counterpart to Bentwaters.

 put me in touch with them. This could be solid corroboration.

R.

1. Obtain full name, address, phone numbers, email and other data and record same.

2. Obtain brief educational and employment history relevant to the testimony (ie, government, military, intel., corporate)

Witness will provide us with a complete military history and discharge record, to be faxed over at the earliest possible convenience. Employment history shall also be made available upon request.

3. Record the details in summary form of the witness' testimony, providing salient information on date, location, position and involvement at the time of the UFO/ET event or project.

Witness claims to have been "set up" by his military command for an alleged abduction in 1967 while serving as an infantryman on the Hunter Liggitt Military Reservation in the N. Mojave Desert in S. Calif. He clearly recalls observing a UFO with other soldiers at night. The UFO disgorged five smaller objects which assumed a triangular flight pattern, and then swooped down upon the soldiers. The next thing the witness recalled was finding himself paralyzed and then onboard a craft naked, laid out upon a table, in telepathic communication with non humans. He described both typical "grays" and one commanding presence that he described as a "light being" without a physical body. The message transmitted from the light being was that something wonderful would be taking place in the near future and that they would be seeing one another again. He recalls being given an injection on his right side and being given a bitter substance to swallow. He was told that he would not remember what was taking place, which he defied, telling his captors that he would remember everything. Prior to the abduction sequence starting, the witness had observed the time on a nearby clock, and when he was returned to the ground, he noted that 3 hours had elapsed.

The witness reported his experience to a commanding officer and was warned that he would be "sent to the nut house" if he didn't keep his mouth shut. He persisted to insist that his story was true, and was handed a strangely colored cigarette by a commanding officer. When he smoked it, he recalled a feeling of euphoria come over him that was identical to the euphoria that he had experienced during the abduction experience. The witness continued to speak out and was finally sent to the base mental hospital for two months and given was Thorazene for alleged PTSD.

4. Ascertain the witness' degree of cooperation : Is he / she willing to be interviewed under full identity? Under a disguise (we want to discourage this except in rare cases) ?

Highly cooperative. Witness has provided interviews to Linda Moulton Howe and has given a number of TV and radio interviews. He strongly feels that the military is somehow behind the abduction phenomenon, but insists that the beings he encountered onboard the craft were non human. He also claims to have seen his first daylight UFO as a 5 year old in 1951.

He has since dedicated himself to videotaping UFOs in the skies around his home, using his own form of CE-5 telepathy to attract their attention. He has amassed thousands of photos and hundreds of hours of video footage which he is willing to make available to the Project. Much of his footage allegedly shows clearly defined spacecraft in full daylight. We are invited to examine his library and to utilize as much as we need.

5. Ask if he/she has corroborating witnesses to the event or project or corroborating documents and other materials.

The witness mentioned two other former soldiers who allegedly were abducted from the Hunter Liggitt facility. He gave the name of a contact for those individuals and suggested that we locate those witnesses to corroborate his story.

6. Always ask if the witness has other evidence, networks, or contacts to other witnesses which could be useful to the project (they may not offer this and so this should always be asked).

The witness keeps in touch with other retired military men who experienced or witnessed UFO occurrences.

7. Write your own assessment of the value of the witness' testimony and credibility, and HOW the witness comes across (articulate, etc).

Articulate, stable, truthful, angry.

8. Let the witness know that we will be contacting him/her later to set up a date to conduct a full interview.

Done.
