

Steven M. Greer MD

Sensitive and Confidential

19 October 2007

Dear President Carter,

Our mutual friend, John Martin, asked that we send you some materials, which are enclosed.

By way of introduction, I am an emergency/trauma MD whose uncle was the senior project engineer that designed the Lunar Module at Grumman for the moon landing. As a young child, I learned of many things that I was not supposed to know. Like yourself and John, I also had a close sighting of an ETV (extraterrestrial vehicle) around that same time.

You were the first President for whom I had the honor to cast a vote when I was 21 and about that I have no regrets. My wife and children and I admire you greatly.

A few key milestones that may be of interest to you:

- In 1990, I founded a project to investigate and initiate a citizen's diplomatic program to contact these objects (and the beings within them) to establish a peaceful, open level of contact. We have had marked and gradually increasing success.
- Currently, a major G8 country, its Ministry of Defense and scientific leadership has asked us to lead an effort to make open contact with these visitors with this country's leadership present, to be followed by a major public announcement. This initiative is *exquisitely sensitive and confidential*, as I am sure you can appreciate, and is pending review by the President of that country. I feel it would be helpful for you to be privately briefed on this matter and also to be given some documents from this Ministry of Defense addressed to me regarding this mission.
- Beginning in 1993, we founded The Disclosure Project (www.DisclosureProject.org) to bring this information out to the public. We now have over 500 military, intelligence and corporate witnesses to events and projects working with us on this initiative. The evidence is overwhelming, as you can see from the enclosed materials.
- In December of 1993, I was asked to brief sitting CIA Director R. James Woolsey on this matter. President Clinton, as well as Mr. Woolsey, had – like yourself- made inquiries into the UFO matter but were denied access to this information. Subsequently, I also briefing Adm. Tom Wilson, J-2 (head of Intelligence, Joint Staff) and Gen. Patrick Hughes,

the director of the Defense Intelligence Agency, among many others. They also were denied access to the compartmented operations dealing with this matter, notwithstanding their high rank and positions.

- For personal reasons, President Clinton elected not to pursue the matter further and we began to brief senior members of Congress, including Senate Intelligence Committee and House National Security members. Unfortunately, they also had been denied access to these projects, as had Senator Claiborne Pell, whom I briefed personally on the matter. In this process, we discovered that most of these compartmented operations were controlled by corporate, institutional and financial interests that were rogue, unconstitutional and violating the national security laws of the US, UK and other countries.
- Subsequently, in May of 2001, we unilaterally began the process of disclosing this information, beginning at a major National Press Conference event in Washington DC (DVD is enclosed).
- The reasons for the secrecy are complex and beyond the scope of this brief letter, but include:
 - Fear of exposure of illegally run 'unacknowledged special access projects' (USAPs);
 - The potential impact on fundamentalist / orthodox religious beliefs;
 - Most importantly, the release of information leading to scientific elucidation of the energy and propulsion systems behind these objects, which is now well understood at Lockheed Skunkworks, Northrup-Grumman, SAIC and other large military contractors. The source of energy is from the quantum vacuum flux field and this scientific discovery will make the need for oil, gas, coal, centralized utilities and so forth unnecessary after disclosure.

We have now formed a research and development project, Advanced Energy Research Organization (www.AERO2012.com) to gather the best scientific minds together to build, outside of these rogue, and illegal classified programs, peaceful energy generation systems based on these scientific breakthroughs. If we are successful, the world will be able to move to its next level of evolution, free of pollution, free of poverty and the current geo-political and geophysical melt-down which now threatens humanity. The technical hurdles are, in fact, much less than the spiritual, political, geo-political and financial ones.

I hope that we can meet to discuss these matters confidentially and so that I may give you these documents from the Ministry of Defense that outline our contact initiative. You certainly have a right to know now- even if you were not told of these matters as President. While the UFO matter is very controversial and perhaps not a subject with which you wish to be publicly involved (I more than anyone appreciate the social opprobrium and ridicule attached to the subject...) the energy, environmental and peace issues connected to the energy project may be of immediate interest to you.

I would be honored to meet with you in Atlanta or Washington DC (we have a home there) at your convenience and confidentially, to discuss these matters further.
I greatly admire all that you have done and are doing on behalf of humanity and please be assured of our most sincere prayers for your health and success.

Most respectfully,

A handwritten signature in blue ink, appearing to read "Steven M. Greer MD". The signature is fluid and cursive, with the first name "Steven" being more prominent.

Steven M. Greer MD

CEO

Advanced Energy Research Organization
