Hello Dr. Greer.

I am [REDACTED] I contacted you a while back when felt comfortable about sharing my experience with you. I am the former USN Operations Specialist, that witnessed a UAP that came from underneath the ocean in the Atlantic about a day out of the Mediterranean, when we were heading back to Norfolk NOB after our deployment. I worked in the CIC on the USS San Diego AFS-6. Just to jog your memory, I also so orbs of lights going in and out of the water at incredible speeds and then the tic tac objects hovering above the disturbance in the water. Then the eventual craft emerging from the sea and the colors of the orbs merged on the edge area of underneath the craft and the craft dipped back into the water and then took off straight up into the atmosphere and disappeared from site along with the tic tacs trailing. I found the cruise book on line as I did not purchase one. I found the officer that was on the bridge wing and witnessed it with me, that said he thought it was a flare exercise with submarines, to which I replied no....no sir....this is not from this world. I am

in a much better position in my life now. When I talked to you before I was just out of my 3rd back surgery and was dealing daily with chronic pain. I am happy to say I am much stronger and I am going to college to obtain my masters in social work. I want to help my fellow veterans. I am ordering the deck logs from the Navy Historical Command in MD. I tried to do so on the National Archive site but the logs were not available for my ship. As soon as I get the logs I will contact you and let you know if there is any mention of the event. I ordered the logs from 1988 to 1993. The event was in January I believe in 1991. I will have to look up the cruise book again to verify that.

I hope you are well, and I thank you for your time Dr. Greer.

Very Respectfully,

XX
