The Disclosure Project

Attention: Dr. Stephen Greer

Dr. Greer:

Enclosed, you'll find some of the documentation supporting my incident. Sorry I haven't responded sooner to your request for these documents, I have been quite busy.

Thank you for a copy of your book, "Extraterrestrial Contact". I have not had a chance to read it but I look forward to reading it when my time allows.

I wholeheartedly support your efforts to get a public airing of the many actual incidents involving UFOs and military installations. Please let me know if I can help further this effort.

Best Wishes,

**THIS IS AN IMPORTANT RECORD  
SAFEGUARD IT!**

Mr.   

March 29, 1998

Re: 341st Wing History for January - March 1967

Dear 

I apologize for the delay in responding to your inquiry about my recollection of the events concerning UFO sighting around Echo and November Flights. As I mentioned by telephone, it was my recollection that there were no compelling explanations given about the cause of the incident in March 1967.

I don't specifically recall the foundation for the report in the history on page 38 that stated the rumors about UFO were disproven. This section of the history includes the response of the Mobile Strike Team and the radar squadron's report of no sightings or radar readings. This information was obtained from the footnoted report by the Engineering Investigation Team. I don't recall interviewing the Mobile Strike Team or anyone in the Radar Squadron. What I do recall is that there was a general unwillingness to discuss the subject by anyone I contacted.

As I mentioned, I was an enlisted airman with no command authority and the position of base historian was not given much attention or support by the command structure. The history would be reviewed by the command structure and sometimes changes would be prescribed before it was released. There were two times that I recall where sections of the history were scrutinized and changes beyond editorial were made. These were the UFO sightings history and a reported morale problem in the fighter interceptor group.

I do not know anyone that may have additional information about the incident. Good luck on your novel!

Regards  

DEPARTMENT OF THE AIR FORCE  
WASHINGTON DC 20330-1000

OFFICE OF THE SECRETARY

SAF/AAIS (FOIA)  
1620 Air Force Pentagon  
Washington DC 20330-1620

28 DEC 1993

Dear [REDACTED]

We have no records which responds to your October 22, 1993 Freedom of Information Act request.

The regulations referred to in Brigadier General Bolender's report dated October 20, 1969 related to procedures for reporting events that could affect national security. No UFO report affected national security, as is noted in the third paragraph (highlighted) of the attached USAF Fact Sheet, Oct 87.

The authority for this decision is Mr. V. W. Culkowski, Deputy Director of Plans and Requirements, ACS/Intelligence, HQ USAF.

If you interpret this "no records" response as an adverse action, you may appeal it to the Secretary of the Air Force within 60 calendar days from the date of this letter. Include in the appeal your reason for reconsideration, and attach a copy of this letter. Address your letter as follows:

Secretary of the Air Force  
THRU: SAF/AAIS (FOIA)  
1620 Air Force Pentagon  
Washington DC 20330-1620

Sincerely

[REDACTED]

Freedom of Information Manager

event. The team went off to do the report. Meanwhile I was contacted by our representative at OOAMA (Don Peterson) and told by him that the incident was reported as being a UFO event--That a UFO was seen by some Airmen over the LCF at the time E-Flight went down.

Subsequently, we were notified a few days later, that a stop work order was on the way from OOAMA to stop any further effort on this project. We stopped. We were also told that we were not to submit the final engineering report. This was most unusual since all of our work required review by the customer and the submittal of a final Engineering report to OOAMA.

Days later, I asked our Boeing/OOAMA rep what was going on. His reply to me-- off the record--- was that the LCF capsule jockeys were suspected of causing the problem some-how by something they did to one of the digital racks in the LCF. The Air Force capsule officers apparently were quietly removed from their job as LCF officers. This part of the story can not be verified by me, as it was hearsay.

#### Other information

I also know that OOAMA conducted some engineering tests on their own, in their HETF (Hill Engineering Test Facility) at Hill AFB. The results of those tests were not made known to group I worked for. The HETF was a place where OONE-- engineering at Hill AFB did some of their own analysis. Boeing did however have engineering support at Hill AFB and assisted them as requested. Don Peterson our Boeing rep at Hill AFB is probably the key to uncovering this information. Another Boeing person there was Bob Blair.

Other engineering testing was conducted by Boeing at their Network Resolution Analysis (NRA) facility in Seattle. There was probably a report generated on that work and is referred to in the papers you sent me. However, as I recall nothing explained the anomaly at E-Flight. The location of this effort is also probably in Boeing archives. Current Boeing Minuteman personnel may shed light on prior activity.

Don Peterson the Boeing Rep at Hill AFB may have additional leads on who the Airmen were that reported the original UFO story. I never had that information. I would think that Malmstrom AFB is the place where that information resides. I have not talked to Don Peterson for some years but will make an attempt to contact him for you. He may have other leads and personnel names.

called a Controlled Numbered Problem. These types requested Boeing engineering support for a particular problem. The E-Flight incident fell into this second type--It was a Controlled Numbered Problem.

I was handed the E-Flight CNP assignment when it arrived by the group supervisor. As the internal Boeing project engineer, I arranged meetings necessary with management and technical personnel required to determine a course of action to be taken, in exploring why 10 missiles had suddenly fallen from alert status,--green--to red, with no explanation for it. This was an unusual request and we had no prior similar incident or experience to this kind of anomaly. At the time of the request, no mention was made of an UFO involvement. Meetings were held with parties from Test Engineering, and Systems Engineering along with Logistics who ran the meeting. This project was not classified.

Since this was a field site peculiar incident, a determination was made to send out an investigation team to survey the LCF and the LF's to determine what failures or related incidents could be found to explain the cause. The team was made up of qualified engineers and technicians headed by scientific person who was a glaciologist. There were about 5 persons in all that were sent out. After a week in the field the team returned and pooled their data. At the outset the team quickly noticed a lack of anything that would come close to explain why the event occurred. There were no significant failures, engineering data or findings that would explain how ten missiles were knocked off alert. This indeed turned out to be a rare event and not encountered before. The use of backup power systems and other technical system circuit operational redundancy strongly suggests that this kind of event is virtually impossible once the system was up and running and on line with other LCF's and LF's interconnectivity.

The only thing that even came close to a failure was that a transformer on a commercial power pole down the road from one of the sites was in the process of failing. It exhibited a intermittent transient type of failure that could have generated noise spikes on the power line. This in itself could not have caused the problem at E-Flight. The problem was reported to the local power company who took action to replace the transformer.

The team met with me to report their findings and it was decided that the final report would have nothing significant in it to explain what happened at E-Flight. In other words there was no technical explanation that could explain the

[REDACTED]  
2-1-1997

Hi [REDACTED]

I received your package of information on Tuesday January 28, 1997. After reviewing the information it sure revived memories concerning the Malmstrom AFB E-Flight investigation of which I was the Boeing in-house project engineer for the field team investigation. Per your request I have documented my direct involvement as I recall the event and give names and other information not previously covered in my book, "Lying Wonders."

As I previously mentioned to Bob Salas and others, I never submitted a final report from Boeing to the Air Force. A final report was generated but not submitted. This will become clear as you will see in my recollection noted below. The same engineering report you refer to is in all probability in Boeing archives. I'm not sure how to get access to it at this time--however I will make a few suggestions.

Report of E-Flight Incident  
by [REDACTED]

At the time of the incident, I was an engineer in the MIP/CNP (Material Improvement Project/Controlled Numbered Problem) group. This was a Logistics Engineering group. The group was contracted by the Air Force so that Boeing could respond to specific Air Force Minuteman Missiles problems that occurred in the field. The assignments came from the OOAMA Air Material Command. Our group was made up of a small unit of engineers that were knowledgeable of, and had worked on the Minuteman Missile program. The supervisor of the group at the time was a person named Donald Heck.

We were usually notified by our OOAMA Boeing contact (located at Hill AFB) when a request was coming in from the Air Force. Don Peterson, was our Boeing OOAMA contact. The requests came usually in two forms. One was a MIP request that covered a variety of things. These would range from quality problems, corrosion problems or the unavailability of parts needed for maintenance and so forth. The second type was

~~CONFIDENTIAL~~

The only possible means that could be identified by the team involved a situation in which a coupler self test command occurred along with a partial reset within the coupler. This could feasible cause a VRSA 9 and 12 indication. This was also quite remote for all 10 couplers would have to have been partially reset in the same manner. <sup>80</sup> (U)

Further studies of this problem will be accomplished at the contractors facility since a full engineering investigation is not feasible at this level. (U)

In the researching of other possibilities, weather was ruled out as a contributing factor in the incident. <sup>81</sup> (U)

A check with Communication maintenance verified that there was no unusual activity with EWO-1 or EWO-2 at the time of the incident. <sup>82</sup> (U)

Rumors of Unidentified Flying Objects (UFO) around the area of Echo Flight during the time of fault were disproven.  
A Mobile Strike Team, which had checked all November Flight's LF's on the morning of 16 March 67, were questioned and stated that no unusual activity or sightings were observed. <sup>83</sup> (U)

The 801st Radar Squadron, Malmstrom AFB, gave a negative report on any radar or atmospheric interference problems related to Echo Flight. <sup>84</sup> (U)

[REDACTED] UFO Incident Malmstrom AFB, Montana - March 1967

As I mentioned in our telecon, this letter is to confirm our recent telecon.

In 1967 I was a young captain stationed at 28th Air Division, Malmstrom AFB, Montana. While there I had responsibility for the Communications Center serving 28th Air Division. I was also the Top Secret Control Officer and was in charge of the Cryptographic Center. This duty included issuing Top Secret two-man launch authenticators.

I can distinctly recall during March of 1967 reading a classified message that came through my communication center concerning a UFO that was seen hovering near a missile silo and had been observed by the missile personnel on duty. I do not recall the exact date nor to whom the message was sent. I suspect we in the 28th Air Division were info addressee only. I do not recall any mention of missiles being deactivated. As part of our communications training, we were strongly indoctrinated that messages we happened to read during duty were not normally to be discussed outside the classified area. Many messages were very sensitive in nature as you can well imagine. The message concerning the UFO was so unique that it clearly registered with me.

I went on to spend 26 years in the US Air Force as a communications electronics officer and retired as a colonel in 1986. I held a Top Secret clearance throughout my career. On a couple of assignments I also held a Top Secret SCI/TK clearance. This required an extensive background investigation that was much more comprehensive than an ordinary Top Secret clearance.

I hope this helps you somewhat. Sure would be curious to hear how your investigation works out. Good luck!

Sincerely,

[REDACTED]

[REDACTED]

[REDACTED]

Dear [REDACTED]

Sorry for the delay in replying to you. Our daughter had a baby, our first grand child, right after our conversation and I have difficulty getting back to the regular grind after we returned from helping her.

After our conversation on I tried to recall what happened 30 years ago. The following is what I remember.

Some weeks before March 16, 1967 while on alert at Echo I was called from one of our guarded sites. The airman on duty said he was seeing something outside the perimeter fence that he had never seen before. This object was lighted and seemed to be watching the site. It approached and retreated and something circled the site. This conversation lasted for a long time, certainly an hour maybe longer. The young man was clearly distressed by what he saw. When I told him to use his weapon if it entered the site. He said that he appreciated the order but didn't think it would do any good.

We had no indications that anything was amiss from any other sites during the period of the conversation. I also recall the paper reporting a number of UFO sightings during that same period.

Later that year I was the commander when Boeing came out to Echo and tried to replicate the shutdown. I remember this clearly because the team chief briefed me that what he was about to do could result in damage to equipment and shutdown of on alert missiles. When they cycled the power at the substation the floor of the capsule rocked and made horrible sounds but nothing broke.

Thanks for the copy of the official history. This proves something I have told my kids for years. They now believe old dad wasn't crazy after all.

If there is any thing else you have questions about I would be happy to answer them. No one ever asked me not to talk about this event, so I feel free to discuss it with anyone.

Yours truly,

[REDACTED]

10/1/96

Hello 

Sorry about the delay in responding to your correspondence. Since talking to you, we have been on trips to Montana and Utah and attempting to coordinate repair efforts on a condo which we own in Glendale, AZ - on Aug 14, a storm with winds up to 125MPH with hail and 3" of rain within one hour did about \$7,000 in damages.

The info you provided is very interesting but I have slightly different memories - which could easily be incorrect as they say, "The memory is the second thing to go."

My records indicate that we were formed as a crew in Sep 66 in "N" status. I don't have the date of upgrade to "R". Our home site was Oscar. I left crew duty for the Command Post in early Nov 67.

Related to the incident itself, I recall us being at the Oscar LCF. Topside security notified us the mobile team had reported observing the "UFO" while responding (obviously at your direction) to a situation at an outlying LF - this particular one being located just east of Highway 19, the state highway which runs north from Grass Range to the Missouri River. With little or no direction from higher authority (Command Post or Alternate Command Post), the Security team was directed to return to the LCF, maintaining radio contact at all times, as the security system reset. While enroute back to the LCF, radio contact was lost and remained out until the security vehicle approached the LCF. Two very upset young men wasted no time getting back inside.

I do not recall personnel injury of any type but the two individuals were sent back to the support base early. I heard second-hand that one was released from security team duties.

I do not recall any follow-up activities by any Wing personnel. The Command Post checklist, as I recall, just said to report any such incidents to civilian offices.

This probably does not assist your efforts in any way, but I applaud your continued interest in a fascinating area of interest. Do these alien UFOs exist? I do not know, but there are certainly enough reported situations that I must be inclined to suspect that they do. There are numerous folks who get together each year at a small town north of Las Vegas that maintain that "aliens from other planet(s) have visited this area." Some maintain that the Air Force has captured at least one.

In Montana, while we there, an individual associated with the Great Falls Electrics baseball team, a Mr. Nick Mariana (SP?) was very outspoken about his observations, complete with photographs. Have you correlated your investigations with his?

I wish you success in this challenge. Please keep me posted. If you ever get to Vegas, I hope we can get together.

Best Regards,

## Letter of Recommendation for Chang, Heng-chih (John)

John was one of my strongest students in AP Calculus. He typically achieved the highest scores on exams. I believe he earned these because of his strong work ethic and dedication toward high achievement.

Personally, he is always polite and inquisitive in class. As an individual he displays an unusual maturity for his age. He is a natural leader because of these personal qualities.

John is one of the most outstanding students I have ever had the pleasure to teach. He is highly motivated to do outstanding work and usually demonstrates that ability. I am very confident he will excel in his college career.

Sincerely,
