Witness Report

1. Obtain full name, address, phone numbers, email and other data and record same.

V [REDACTED]
[REDACTED]

[REDACTED]
[REDACTED]

2. Obtain brief educational and employment history relevant to the testimony (ie, government, military, intel., corporate).

Witness is 87 years old, of sound health and mind. Retired Army Major with intelligence background and former OSS/CIA officer. WWII Vet. Broke with CIA in 1981 to violate his security oath in regard to the UFO/cover-up issue. Survived at least one attempt on his life and numerous death threats and harassment. Overt surveillance and harassment ended in 1991.

3. Record the details in summary form of the witness' testimony, providing salient information on date, location, position and involvement at the time of the UFO/ET event or project.

While serving in Army Intelligence under a need-to-know clearance, witness was privy to full documentation of a UFO "soft landing" at White Sands New Mexico in the Fall of 1948 which resulted in the death of a flight crew of five ETs. A port had blown out and the occupants had died of rapid exfixiation. The craft and bodies were recovered by the military. He examined and handled photographs of the event, including pictures of the bodies, their garments, full details on their anatomy, and read all of the first-hand reports concerning the disposition of the craft. The craft appeared to be hermetically sealed, and was opened only when the military used a "probe pole" to fish around and triggered a mechanism which opened a hidden hatch. The military thus gained entry to the craft and removed the bodies. The craft and bodies were sent on to Wright Patterson AFB. The witness has knowledge of the details of the entire operation, can name units and procedures utilized at the time.

4. Ascertain the witness' degree of cooperation : Is he / she willing to be interviewed under full identity? Under a disguise (we want to discourage this except in rare cases) ?

Mr. [REDACTED] is an international lecturer and travels extensively. He is about to depart for Australia, and won't be returning home until January or February of 2001. I asked whether he would be willing to sit for a video interview between now and departure a couple of weeks hence, but he said he is much too distracted by travel preparations to be able to focus on doing a good interview. It is best to wait until his return early next year.

Perhaps we can contact him while he is in Australia and arrange an interview there?

5. Ask if he/she has corroborating witnesses to the event or project or corroborating documents and other materials

At the time of occurrence, the witness did not know the identities of the soldiers who participated directly in the recovery. They were brought in from several detachments in order to retain compartmentalization and secrecy. He may recall one name of an intelligence cohort who examined the recovery records with him, but it is unlikely that person is still alive.

6. Always ask if the witness has other evidence, networks, or contacts to other witnesses which could be useful to the project (they may not offer this and so this should always be asked).

He may.

7. Write your own assessment of the value of the witness' testimony and credibility, and HOW the witness comes across (articulate, etc) .

Highly credible, articulate and knowledgeable.

8. Let the witness know that we will be contacting him/her later to set up a date to conduct a full interview.

Done

9. The above information should be transmitted in writing to me as soon as the information is obtained and a copy retained by the researcher.

10 Please be sure that the witness understands that his / her testimony will be used in the most credible venue and for briefing senior leaders in the US and around the world.

I faxed [REDACTED] the June 12th press release and the witness participation letter.
