I have an Eye Witness friend that is 90 yrs old. He saw many UFOs over the base that was covered by a strange low overcast. There was a nuclear bomb group about 8-9 miles away from the base. The personnel at the base got excited and everyone heard - mentally - we will not harm you. Four of the craft were right in front of him. They were "beautiful airships, about the size of an F86, no seams in the skin." The units departed the Texas base and went on to Washington State, to another facility there. They then departed and went to Tennessee for another nuclear site. The airmen communicated very quietly as they were told -threatened- to NOT say anything.
