RE: Executive Order Releasing UFO/ETI Witnesses and Documents

We have received approval from Mr. Laurance Rockefeller for the sponsorship and funding for a high level meeting of military, astronautic and government witnesses concerning the UFO/ETI matter. This meeting will take place in May 1995 in the United States, and will be designed to obtain first hand testimony from senior military and government witnesses.

We have received commitments from various participants, including a well-known astronaut with first hand exposure to the subject.

In advance of this meeting we feel that it would be prudent to explore the implications of this meeting and subsequent disclosures with the Administration, and to secure an Executive Order releasing these witnesses from their National Security Oaths/Obligations. We feel that these developments should go forward in a cooperative manner with the executive branch of the U.S. Government, and thus are requesting a brief initial meeting with relevant members of the Administration.

Please advise as soon as possible concerning how we should proceed with this matter.

Respectfully,

Steven M. Greer M.D.
Director of CSETI

**POINTS SUPPORTING AN EXECUTIVE ORDER TO RELEASE
WITNESSES FROM NATIONAL SECURITY OATHS
AND TO DECLASSIFY DOCUMENTS
RELATED TO UFOs/ETI**

> I. Such an Executive Order (EO) would permit witnesses to speak openly about the historical aspects of the subject without fear of legal action against them. If no substantive information is forthcoming from such witnesses, then at least the 'air would be cleared' on this issue, and if major disclosures are forthcoming then an end to inappropriate secrecy would be effected.

>II. Should significant disclosures occur without an EO, the President would be viewed in one of two equally damaging ways:

/ If the President and Executive Branch of the US Government maintain that they did not know anything about a subject this important, Presidential stature and credibility would be significantly damaged.

/If the President and Executive Branch maintain after such an unsanctioned disclosure that they knew of the subject, but were not connected to the disclosures, the President may be accused of supporting a cover-up, which would be unfair in light of the actual facts of how this subject has been covertly handled.

>III. An EO would restore public faith in government in the long run, since such an order would be seen as an act of support of democratic principles, as opposed to the maintenance of the covert status quo.

>IV. The EO would fully utilize the powers of the Presidency to terminate certain 'black projects' activities which appear to be operating out of the constitutional chain of command. While certain aspects of reverse engineering of extraterrestrial technology (and other matters) may not be fully accessed through this EO, it would enable definitive witness testimony to be disclosed. Efforts to keep the President, the Executive Branch in general and the Congress 'out of the loop' would thereby be neutralized.

>V: Provided that the disclosure process (as conceived by Project Starlight) avoids xenophobic, fear-inducing and militaristic overtones, the EO would set events in motion which would usher in a new era of global awareness and unity. The world community could begin the long awaited dialogue on the implications and promises of initiating early interplanetary relations.

>VI. In summary, the risks of not providing an Executive Order on this issue far outweigh the risks of doing so. The benefits of such an issuance are numerous and far-reaching, and would be viewed as a just and moral Presidential act by peoples around the world.
