

First of all I would like to thank you and your husband for the everything you have done and the many years of hard work. I would love to say more but don't want to take up your time.

This story is nothing special, however, I hoped it might add to your overall preponderance of evidence. I will break up the message into smaller sections because I don't know how much I can send at once.

I flew Blackhawks for the Army during Desert Storm and I was a pilot for DHS. My co-worker at DHS, who I don't want to name told me the following story. I can vouch for him and the authenticity of this story as I know him well and this is not something he made up.

He was an F117 pilot working out of Area 51 years ago. I'm not sure what year this was. They only had certain times they were allowed outside but he accidentally stepped out of the hangar once (to take out some trash) when he was supposed to stay inside.

He saw a large, black, triangular shaped object. It was flying above the runway at high speed and it was totally silent. It took off fast and gained altitude very quickly. He did not say if it had lights or tell me anything else. He did not know what it was and never saw anything like it again.

I know this is minor and probably something you are well aware of. I promised him I would never tell anyone but I feel the work you are doing is way too important. I don't know if this info helps but I feel a duty to let you know because of the work you are doing. I hope I have not wasted your time and hope that maybe this can corroborate other accounts.
