Dear Phil,

I wanted to clarify a few issues that may relate to your concerns about the use of your interview and your father's interview in the book "Disclosure".

#1. This edition as it states on the cover is a prepublication edition only. It is a self-published book and was printed on a very small run. It is NOT in bookstores or in a traditional book distribution network. (It is not at all the situation your father's book was in being handled by a major publisher.) It was basically published to be used as an educational tool.

#2. Many of the copies of the book are being given away to Congressmen, Senators, and VIPs in the environmental, political and energy areas. These are the very people stated in all the Disclosure Project materials that we wanted to reach to be able to educate them about the reality of the UFO subject and its importance to current human problems.

Because you have concerns about your father's and your interview appearing in this book I am willing to remove them in any further printings of it and /or if it should be picked up by a traditional/mainstream publisher. (There are no plans for either at this time.) I must say that I do not think that would be in your best interest as the appearance of the interviews in "Disclosure" which has such high credibility can only enhance the validity of what your father has to say. In my opinion the placement of those interviews with other credentialed military and government witnesses who corroborate the testimony of your father in no way detracts from him, but enhances his legacy.

I hope we can resolve this issue speedily and simply.

Looking forward to your reply,
Sincerely yours,

Steven M. Greer, M.D.
