

Comp. File "Carter"

13 April 1998

Dear President Carter,

I am a medical doctor in NC and Director of CSETI (the Center for the Study of Extraterrestrial Intelligence). For years I have admired your courage, your ethics and your commitment to world peace and human justice.

You are invited to review the enclosed materials relating to a definitive disclosure related to the UFO/Extraterrestrial issue - a disclosure which will have profound implications for human society, geo-politics, technology, the environment and the sense of who we are as a people.

For over four years I have been briefing world and national leaders in advance of this disclosure, including Director of Central Intelligence Jim Woolsey, senior White House staff, UN Secretary General Boutros Ghali via his wife Mrs. Boutros Ghali, former British Ministry of Defense head Lord Hill-Norton and numerous members of Congress, among others.

While there is general agreement that a disclosure related to this matter is long overdue, for the most part these world and national leaders have been deliberately left in the dark by the covert entities which manage the subject.

I have identified over 150 top-secret military, intelligence and aerospace workers who are willing to come forward publicly to disclose what they know and end 50 years of secrecy on this matter.

In preparation for this, I invite you to contact me confidentially to discuss this historic development. We very much feel that, at the time of this disclosure, the world will need men of good will such as yourself to speak to this matter in a way which is calm, reassuring and which avoids the pitfalls of xenophobia and militarism for which our species is so noted.

Should it be your wish, I would be honored to come to Atlanta to discuss this matter with you confidentially.

Respectfully,

Steven M. Greer M.D.  
Director of CSETI

Carter Center

The Carter Center in Atlanta, Ga., is a nonprofit, nonpartisan public policy institute founded by former U.S. President Jimmy Carter and his wife, Rosalynn, in 1982. The Center is dedicated to fighting disease, hunger, poverty, conflict, and oppression through collaborative initiatives in the areas of democratization and development, global health, and urban revitalization. At present, the Center operates 13 core programs, which have touched the lives of people in 65 countries, including the United States.

The Center is a separately chartered and independently governed member of the Emory University community. Carter Center programs are directed by resident experts, many of whom hold academic appointments at Emory University.

Its unique, effective combination of resources is The Carter Center's strength. Jimmy Carter's stature as a world leader provides the Center with singular access, vision, and direction. Emory University's strong academic programs provide a solid base for studying contemporary issues and implementing solutions to global problems.

The construction of The Carter Center facilities was funded entirely by \$28 million in private donations from individuals, foundations, and corporations. Dedicated on Oct. 1, 1986, the complex of four interconnected buildings, totaling nearly 100,000 square feet, houses offices for the former president and first lady and the Center's programs. The complex includes the nondenominational Cecil B. Day Chapel, conference facilities, The Carter Center Gardens, and The Jimmy Carter Library and Museum, deeded to and operated by the federal government.
