

██████████ - Quasi-secret CIA Research at Stanford (1:37)

[Begin Audio]

D██████████: (0:00) The good news is Uri is very interested. The bad news is Uri is very interested in publicity and he has been informed by my interlocutors again at Tel Aviv that that ain't gonna happen. There will be no manner of anything public about such an experiment.

██████████: (0:31) Right. Right. Right. Right. I think that has to be—

[Speech overlaps]

██████████: (0:32) None. Zero. Now— and he said that one of the members, one of the members of the team is a senior author of a book or two actually about Uri and is a senior editor of the Financial Times of London.

██████████: (0:53) Uh huh.

██████████ (0:54) And we would agree that he and only he would have the right of second refusal with ours having first refusal to anything that such an experimental design and result might pretend. For example, if the experiment were to end up being scientifically pristine the data were to show quantum pseudo location between two purely, absolutely pristine experimental MRI scanners, we —we would not say that information could not be part of scientific literature.

██████████: (1:35) Right.

██████████ (1:36) With the appropriate, with the approp...
