

Conf.

August 4, 1992

Dear Tom:

As you can see by the enclosed documents, Ron has admitted that he received the "Aquarius" documents from Henry Azadehdel. I find this interesting in view of the fact that Azadehdel was feeding information to Lee Graham and asking him to get it verified by Bill Moore. At the same time, Azadehdel was asking Graham about our advanced Stealth technology - specifically the A-17. It was my understanding that Moore acquired the "Aquarius" documents from an anonymous source in a meeting with this person in a hotel room in which he supposedly photographed the documents. Something just doesn't sound right here.

Ron has also indicated that he was in the presence of John Grace and John Lear when the name "O.H. KRILL" was created "as a joke." The rest of the material being disseminated by Grace and Lear is also probably disinformation. And again, Ron Regehr also admitted that he stamped "Unclassified" on the "Snowbird" document which was given to him by Graham who had obtained it from Bill Moore. He didn't stamp "Unclassified" on the document until after it had been circulated within the ufological community for four months. What does all this sound like to you. I know what it sounds like to me.

It appears that Lee Graham is again writing letters to various individuals still harping on the fact that it is "he and Moore who are responsible for the dissemination of the MJ-12 material." He has just recently written a letter to Stan Hendler, a Prodigy member, telling him about the MJ-12 scenario and asking what my relationship is with Dr. C.B. Scott Jones. Graham has also written a letter to William Sessions, FBI Director, discussing the disinformation being circulated and he also mentions PSI-Tech and what I had posted on the Prodigy BBS concerning PSI-Tech's publically released information. What do you know about Lee Graham? He seems to me to be a very disturbed individual who is absolutely convinced that he has presented significant information (MJ-12 material) to the general public.

From all of the above and what I and others have investigated, it appears the MJ-12 documents, the "Aquarius" and "Snowbird" documents are fakes. And that there are some very self-delusioned individuals within the ufological community.

Sincerely,

Tommy
