I started to watch his video. I have heard of him before. He really thinks he visited other planets and has ET DNA. It would still be good to check him out though. He gives some project code names and corporate entities I know we don't have on our list

witness and facilities list

I'm going to ask Steve if we could get [REDACTED] to verify info about this guy.

Hello Dr Greer.

It is finally nice to be to the point in time where I am contacting you. My name is A [REDACTED] and ever since I awakened in 2012 I have been involved in the field of disclosure. I have a very compelling life story to tell and a witnesses testimony to my understanding and experience to the UFO phenomenon. I have very important information as I am coming forward as an insider on the subjects of black projects and black operations. I am a honorably discharged Marine Corps veteran. And when

I was discharged I wrote a book about my experience being a marine but most importantly my recall of being involved in Milabs(military Abductions) and being a supersoldier for the secret space program. My proof is my testimony and I also have a footage of UFOs that I have caught on camera. My story goes very deep and is very in depth but just to touch on it my involvement with black projects really began before me with my grandfather who was an engineer for United technologies. He worked on the black projects and was never allowed to talk about what he was working on. He designed propulsion systems and lasers. He actually has the patent for the reactor thrust control valve(which is the vertical takeoff and landing component) this invention was used in the engine of the X-2 hummingbird. He also helped design the Sr-71 engine. As far for my story I am a milab/supersoldier for the secret space program. I remember being taken at 6 years old to a deep underground military base where they put implants in us and trained us to be supersoldiers I can get much more in depth but I will save that for my testimony. I remember doing mission on this world and other worlds and I remember being exposed to all the technology and to the world of the deep black operations. I believe I have very valuable insight on this matter as my whole life has been groomed for my disclosure of my involvement of being a milab supersoldier for the secret space program. My book is called Son of the Morning by A [REDACTED] and this is one of the interviews I have done for my disclosure <https://youtu.be/lfTTGBjntdg>

Thank you for taking the time to review my testimony, live long and prosper.
