

RESPONSE TO REQUEST FOR SEPARATION DOCUMENTS/INFORMATION

RE: 

MILITARY SERVICE DOCUMENTS ARE EXTREMELY IMPORTANT. GUARD THEM CAREFULLY AGAINST LOSS OR DAMAGE. TO AVOID DELAYS IN OBTAINING THESE DOCUMENTS IN THE FUTURE, WE SUGGEST THAT YOU MAKE COPIES OF THE ENCLOSED DOCUMENTS.

- ☒ The attached document(s) is(are) furnished in response to the request.
- ☐ The attached separation document may include the following information: Authority for separation, reason for separation, reenlistment eligibility code, and separation program designator/number. If you require a copy of the separation document that does not contain the above information, you may request a deleted copy from this Center.
- ☐ DD Form 214, Certificate of Release or Discharge from Active Duty, is not issued when a service member dies while on active duty. We are furnishing the notification of death that was issued to the next of kin in lieu of the requested document.
- ☐ Service members who are dropped from the rolls of the military service are not issued a Certificate of Release or Discharge from Active Duty or a Discharge Certificate. Enclosed is a copy of the order effecting discharge.
- ☐ Because of an error on the separation document we have instead furnished NA Form 13038, Certification of Military Service. This will verify military service and may be used for any official purpose. The veteran may request that the separation document be corrected.
- ☒ A seal has been affixed to the enclosed document(s) to attest to its (their) authenticity.
- ☐ Discharge certificates are prepared in the original only; therefore, copies cannot be furnished.
- ☐ Title 32, Part 45 of the Code of Federal Regulations prohibits this Center from furnishing to third parties copies of separation documents which contain the type and character of discharge, authority and narrative reason for separation, reenlistment eligibility code, and separation program designator/number. If you require a copy of the separation document containing the above information, the veteran must specifically authorize the release of an UNDELETED copy of the separation document.
- ☐ The type of discharge/separation received is shown as "UNCHARACTERIZED SEPARATION - Entry Level Separation." The Department of Defense established on October 1, 1982, the "Uncharacterized Entry Level Separation." Entry Level Status is the first 180 days of a period of continuous active duty or active duty for training. A separation initiated while a member is in entry level status may be described as an uncharacterized entry level separation. Upon separation the service member does not receive a discharge certificate or character of service. The separation shall be described as an order or release from custody or control of the service concerned.
- ☐ Copy 4 (member copy) of DD Form 214 is not on file. The attached copy will serve the same purpose as Copy 4.
- ☐

Date: 7-26-94

**INTERVIEW WITH [REDACTED]
CSETI FORT COLLINS, COLORADO WORKING GROUP COORDINATOR
18 MARCH 1995:**

[REDACTED] was in the Navy during the 1950s. In 1956 through 1958, he was on board a ship stationed at the Dew Line in the Atlantic. At this time, there was a great conflict with Russian trawlers. [REDACTED] was a radar technician. He related that time and time again he and other crew members would observe radar blips of a solid object traveling from 3,600 to 4,000 mph at an altitude of 25,000 to 30,000 feet. The signals were very strong. [REDACTED] reported that the blips on the radar screen would be as large as his thumb. He stated that the radar would pick up three to four good signals, then the object would be out of range. He stated that these signals often occurred during watch changes, around 10:00 pm and then around 2:00 am. [REDACTED] would report these signals to the officer in charge. All activity was to be reported to NORAD; however, the officer in charge never reported these anomalous signals. This ship had a RCA radar system.

Years later, [REDACTED] heard a talk by a man who mentioned he had a friend who had had similar experiences. Through this speaker, [REDACTED] was put in touch with the retired Air Force man who was living in Virginia. This Air Force man was stationed on a ship off the coast of Alaska during the same period in the 1950s. He told [REDACTED] they regularly picked up solid objects on radar traveling at tremendous speeds estimated at 3,500 to 4,000 mph. The objects they tracked were located at 6,000 miles above the earth in deep space. These highly unusual trackings were eventually put on tape. His ship had a GE radar system and the man believes that the tapes may still be in existence somewhere. Once the Air Force became aware of the regularity of these objects being tracked by radar on this ship, they blocked the radar so that it could only "see" up so far! The radar techs lost the ability to track objects in deep space after the Air Force's intervention.

[REDACTED]
