Subject: Rockefeller To Send New Roswell Study To Congress

R[REDACTED] TO SEND NEW ROSWELL STUDY TO CONGRESS

As this edition of CNI News was "going to press," we learned that today's New York Daily News, National Edition, carried on page 12 a story that billionaire Laurance Rockefeller has funded a new study of the Roswell incident. Here at CNI News headquarters in Santa Barbara, California, we were unable to get our hands on the actual newspaper, and calls to the Daily Newshead office in New York didn't help either (no one there could say if the Daily News was posted to the Internet). However, David Daniotti at CompuServe posted a brief summary of the article, which was picked up and sent to us by Rebecca Schatte.

[CNI News will try to get more on this for our next edition. If any reader gets the New York Daily News, please fax the page 12 story to CNI News at [REDACTED].]

According to the Daily News, [REDACTED] says: "I [REDACTED] funded a study of the Roswell Incident and will send it to the White House Science Advisor as well as every Congressman and Senator. The 150 page study includes testimony from former military officials and astronauts 'that contradicts Air Force denials of an alien landing.'"

Another source close to CNI News said recently that [REDACTED] interest in the "alien question" is driven by very personal concern. Now in his mid-80s, [REDACTED] is said to believe that the aliens might be willing to share the secret of longer life, if the U.S. government would promote rather than block open contact.
