Hi Greer & admins, I hope this information gets to you, it seems to be decently hard to contact you.

I got the newsletter email about the secret illegal DUMBS throughout America. You missed a very important one. Possibly in use.

This first DUMB has been reported by [REDACTED] me, and a friend of mine also knows about it. It stretches out past through the granite under Mt. Tom (under the "Mt. Holyoke Range") and all the way over to the UMass campus in Amherst. I thought to be a Vatican type library for classified artifacts, maybe technology, scrolls, crystals, etc. Images attached, including secret aerial sign, "435".

There are also underground tunnels around Barnes airport in Westfield, I know where old entrances are, they are on the Mountain Road, the opposing side from their old grass covered bunkers / hangars.

Westover DUMB references attached:
