

UFO MEETING ON THE ESTATE OF FOND DES BOIS (near DERVAL 44590, FRANCE).

As a positive pre-view of what was to come, about 7 persons of our group saw on Friday 9 July 2010, during the evening what seemed to be a moving object in the starry sky. We were near "LE CHATEAUBRIANT HÔTEL". The object had no lights similar to an airplane (no blinking lights) it was quite luminous and moved faster than a satellite would. Was it a UFO flying on an apparent straight trajectory ?

10 July 2010 at FOND DES BOIS (starting at 9.30 p.m. until 2.30 a.m.)

My brother Marc and also Pierre MORIN, M.D. & Ph.D. (and his niece Jenny) saw on two occasions several objects (5 or 6) crossing the sky at very high speed from left to right at the horizon. They were bright. Their speed must have been in excess of 100.000 Km per hour.

Dr. MORIN was very impressed.

A golden sphere was observed by about 30 persons of our guests who were at least 60 during these 3 nights.

During a few minutes, cracking noises were heard by all of us. They seemed to be as if someone was hitting 2 planks of wood very rapidly at a distance of our circle of chairs.

Some ruby colored orbs were also observed above the trees nearby. I suppose that they were probes moving slowly downwards on the South side of our circle of chairs.

11 July 2010 on the same field at FOND DES BOIS (starting at 9.30 p.m.) It ended, again at 2.30 a.m. on this beautiful Sunday night. (26° C) Most of us observed 2 vertical luminous lines to the South of us in the sky.

██████████ who was seating near ██████████ and Dr. GREER pointed his hand to the zenith to a round light (below the clouds) It was yellow and flashed three times and literally switched off instantly, a few seconds later. Dim.: the dia. was 1/3 of a dime at arm length

On several occasions, the presence of a highly magnetic vehicle is indicated by the magnetometer of ██████████, Eng. (from Florida).

Later, during the night, the magnetometer describes a strange phenomenon : its arm oscillates regularly at 108 pulsations per minute.

Dr. GREER compares this to a heart beat.

As Dr. GREER invites us to stand up and to walk to the East of the field, when we stop on a straight line, we smell a very neat scent of roses. Several people hear entities walking away from us..

The whole crowd seemed to agree that there was a neat elevation of temperature .

A telepathic connection from the "visitors" to Dr. GREER indicated that they were too shy to materialize in front of us.

Spread around inside the circle were 4 or 5 small electronic devices called "WALTERS" . In fact they were simply receivers actuated by our E.T. "visitors" . They emitted a small melodious signal and obviously reacted to the speech of Dr. GREER sometimes by seemingly agreeing to his sentences, all ringed at once in a very exciting manner as if applauding to his speech.

On other occasions, the WALTERS ringed independently of each other, as if monitored by several "visitors", each one having his own personal appreciation of the phrases being pronounced by Dr. GREER.

The whole effect was truly amazing.

Monday, 12 July 2010, the third and last day at the field.

A difference with the two preceeding nights : a cover of low clouds and rain starting after midnight, but not continuous.

Again, some ruby colored dots appearing above the tree line to the South of us and moving downward slowly behind these trees.

During episodes of odd behaviour of Mr. PICCA's magnetometer, several people who owned infrared equipped cameras, their batteries went dead at the same time as if non materialized vehicules had sucked the energy.

A spiritual ceremony sung in sanscrit language by Dr. Steven M. GREER

On a high table (serving as a small altar) with a few candles in order to permit Steven a correct reading of the text, Dr. GREER named the call for the "visitors" the "PUJA" ceremony; a powerful mean to tell the visitors to come in peace and materialize in front of our peace loving group . All the "WALTERS" remained totally silent.

Surprise : a vessel materialized... after the ceremony, it was past 2 a.m. it had plasma around it and appeared to be horizontal, disc shaped and 30 feet in diameter (impossible to tel how thick because of its plasma cover. It remained only a few seconds at ab ut 6 feet above the ground and at a distance of 50 yards from our circle.

It is interesting to note that one "WALTER" emitted a steady signal for 1 hour 20 minutes before the visible presence of the vessel.

Amongst the strange events which are common place in the matter of UFOs, one event may be worth to be mentioned.

All the lights were shut on all cars parked on the west side of the field, when suddenly the lights of one of them switched on, high beams of one and interior lights of the car parked next to it.

Marie-Claire VIRVAUX said that it was her car interior lights which were on . So, she walked to see about the problem and as she went, beams on the other car went dim then shut off.

Marie-Claire was most surprised to notice that the interior lights which turned on as she opened her front door (driver side) switched off immediately after she closed the door . On this late model, lights switch off with a few seconds of delay.

Besides this event, the 3 nights were very active with amazing facts . This is not a complete account of what the atmosphere was during the 3 day seminar.

On the last night, I stood near the exit of the field to greet the guests leaving and the unanimous answer when shaking hands was : "WE SHALL COME BACK HERE ANYTIME, LET US KNOW" .

People had come from Hongkong China, from Norway, Italy, USA, Canada, France, etc.

XXXXXXXXXXXX, eng.

20 July 2010

NOTES:

All I know about the car next to XXXXXXXX is that the owner had no problems when starting the engine when all of us believed that booster cables would be needed after the head lights had shut off.

On all inhabited planets which have vegetation and flowers, roses are known to grow.

On planet Earth, of all essential oils of flowers it is the rose which has the highest frequency : 300 Megahertz.

A LASER canon which can shoot at a distance of 75 km was designed by U.S. army engineers following the theoretical work performed by XXXXXXXX who received his Ph.D. for his research.

All the seminars headed by Dr. Steven M. GREER for the last 17 years have been succesful in calling our friends from space.
