Dr. Greer,

I don't know if my information could help what you are doing, but I and another member of my crew witnessed a UFO over the mouth of Pearl Harbor, early in the year of 1973, while docked at Dry Dock #1 of Pearl Harbor Naval Base. I noted it in the ship's log (I was Topside Watch at the time), and the log was made to dissapear the next morning, with a strong warning to me not to write anything like that again, for the record. We served on the USS Bonefish SS582, and we did contact the Harbor Control office, and spoke to the senior Petty Officer on duty. We also spoke with the air terminal command of Hickam Air Force Base, just next to us, also next to the mouth of Pearl Harbor. They both confirmed they did not have anything on radar, but visual really shook them up. We had to strongly request they look in that direction, before they finally did. They both confirmed what we saw via telephone. Then the object shot straight up, and was gone.

This really did happen. No one would confirm what we saw later. At least I had a witness, and we spoke of this incident for several months later, untill I was transfered to another command.
