Some time ago in the early part of the Millennium i found myself at a dinner with a rock star and the then former president Bill Clinton . At some point during the evening Clinton was asked what the story with Ufo's was. Bear in my this was not a hot mainstream topic at the time, in fact it fell under the category of frivolous conspiracy theory to

much of the mainstream. Former president Clinton's reply was shocking and more than eye opening if not revealing in much detail..

He used the phrase Mind blowing without saying why.

He also added that as President he was briefed on the subject to a certain but general extent and was deterred and dissuaded from using his position to dig further into the subject. This included a conversation with the former CIA director, George W. Bush, who also deterred him from conducting his own investigation. Clinton brought in an outside investigator to pursue the details.

I believe that person was Dr. Steven Greer.
