Dear Dr. Greer,

I recently found your Disclosure Project videos and have found them surprisingly accurate based on the first-hand information i have.

With regards to future NASA Propulsion I worked along side two extremely bright engineers while at Lockheed Martin: Dr. Sonny White and Paula March. They have recently published a paper on warp propulsion, which you will find attached.

I hope the white paper and the names of these men will help you in your work, which I believe to be the work for which you were created to do.

During my immigration to Israel i changed my name to my Hebrew name as my e-mail address reflects, which [REDACTED] will not recognize. When I worked at Lockheed Martin my name was Thom Seals. Please , keep this name confidential in public references since I no longer use it. You may, however use it only when introducing yourself to [REDACTED]
[REDACTED]

I wish you much success and may the fruits of your work be realized soon. My wife just asked me to whom I correspond. I told her your name and she asked why. I responded by saying that I believe you are doing what needs to be done. We firmly believe in your work. The public deserves to know the truth

I am, sincerely [REDACTED] of Safed, Israel

God Bless you.
