MILITARY IDENTIFIERS

Part 2

Photo by Steve Douglass

Where were we when we last left off? Oh yes, I remember. Callsigns and codewords. We were only half way there. Our exclusive list of Intercepts military identifiers continues. Again we thank our callsign compiler and expert Gary Moncur. Gary worked long and hard putting your contributions into a readable form. Thanks again Gary, your help has been enormous.

As you browse through the listings remember. For our next update, we need your callsign listings! We can't do it without your help. Please send us your listings!

Next month we will return with our regular columns and articles. As a preview, be ready to pack up your gear and hike out with us to the desert in search of stealth aircraft. Who knows what we'll encounter on the way. Until then, relax and enjoy.

Continued from Feb. 1994

NEWS BULLETIN

F-16-C-130 MIDAIR KILLS 19

Injures over 100

Dateline March 23

IMNS-2008 , Duke Rumley called Intercepts with the news. Apparently a F-16 trainer collided with a C-130 over Pope AFB, North Carolina. Although the crew of the F-16 ejected and the C-130 landed safely, the flaming debris from the fighter hit a C-141 on the ramp catching it on fire and killing 16 paratroopers who were waiting to board. Over 100 other paratroopers who were preparing to leave on the C-141 on a training mission were also injured. Their injuries ranged from minor to critical. The more seriously burned were flown to Brooks Army Hospital in Texas.

North Carolina military monitor Duke Rumley notified Intercepts just minutes after the tragedy happened. Duke monitored the emergency crews rushing to the scene and relayed the details.

Thanks Duke!

Apparently both aircraft were trying to land at the same time . According to a two-star general on the scene, what we had was a failure in communications. Both aircraft thought they were cleared to land on the same runway.

Intercepts offers our sincere condolences to the families and friends of those involved in this tragedy and salutes all who have given their lives while serving to protect this nation.

NOW AVAILABLE

THE COMPREHENSIVE GUIDE TO MILITARY MONITORING

It's the book that makes the Pentagon nervous.

The ground-breaking book, "The Comprehensive Guide to Military Monitoring" by Steve A Douglass is now available from Universal Radio. In this exciting and controversial radio-hobbyist book, Steve Douglass reveals his military monitoring secrets (and some of the Pentagon's). This book is a must for anyone seriously interested in the military.

For radio hobbyists, *The Comprehensive Guide to Military Monitoring* is the definitive military monitoring bible. For military buffs and aviation journalists it is a fascinating look into the intriguing world of the U.S. military, which includes the latest facts and rumors surrounding covert and "black" military projects, such as the newest super-secret spyplane "Aurora".

No techno-jargon here. Steve spells it out in simple terms how anyone can enter the intriguing world of military radio- communications- monitoring with a minimum of confusion and cost. It's all there. Everything from the equipment needed to the frequencies used by the military. There is even a "milspeak" dictionary of sorts that helps you to understand the military lingo.

A base by base list of military frequencies, the top nationwide frequency listings, maps of military bases and refueling tracks, a source guide and even a complete listings of the U.S. Navy's FLTSATCOM channels are all included in *The Comprehensive Guide to Military Monitoring*.

But of all the chapters in this book, the last is the most intriguing. In it Steve describes the shadowy world of stealth aircraft and includes some photos and illustrations of secret aircraft that the Pentagon would rather you not see. Steve is a self-professed "stealth chaser" and recently captured the only images of the "TR-3A Black Manta" that the Air Force still denies exists. A haunting video still of the aircraft is featured in the book.

The Comprehensive Guide to Military Monitoring is available for \$19.95 (\$4 S&H) through Universal Electronics, Inc., 455 Groves Road, suite 12, Columbus, Oh, 43232. phone orders: 614-866-4605; FAX 614- 866-1201

Inside Information For The Serious Military Monitor

INTERCEPTS NEWSLETTER

The fascinating world of military monitoring requires up to the minute, inside information. At last military monitors have found a solid source of military monitoring intelligence - INTERCEPTS - the newsletter for the serious military monitor.

Latest Information On

Shortwave and VHF/UHF military frequencies, call signs and codewords! Latest military news, first peeks and unintentional leaks. Monitoring equipment reviews- What works - What doesn't. Stealth updates and military aircraft profiles. Air Force Base profiles complete with latest frequencies and readers Intercept reports!
